

would be decommissioned after use associated slash treatment or brush disposal and reforestation activities. This proposal includes reconstruction or improvement of 24 miles of existing roads to provide access to proposed harvest units while improving drainage, improving fish passage, or reducing the potential for sedimentation. Up to 30 miles of existing Forest roads, which have been identified through roads analysis as being no longer needed for administrative purposes, would be decommissioned as part of the proposed action.

The project does not propose to mechanically treat vegetation or construct roads in existing inventoried roadless areas. There is no proposed construction of new permanent roads in the proposed action.

#### Responsible Official

Bruce Bernhardt, Nez Perce National Forest Supervisor, Nez Perce National Forest Headquarters, Rt 2 Box 475 Grangeville, Idaho 83530.

#### Nature of Decision To Be Made

The nature of the decision in attaining the purpose and need is to determine the type and level of silvicultural treatments, and transportation projects needed within the scope of the Nez Perce National Forest Plan, 1987, and to determine a course of action to implement these actions.

#### Scoping Process

This Notice of Intent provides a description of the proposed action for public review and comment. The Forest Service is coordinating efforts with the USDI Bureau of Land Management, the Nez Perce Tribe, Idaho Department of Fish and Game, Idaho Department of Environmental Quality, National Marine Fisheries Service, USDI Fish and Wildlife Service, U.S. Environmental Protection Agency, and other agencies and groups. To generate meaningful dialogue with the public, Nez Perce National Forest staff will issue local press releases and other opportunities for the interested public to meet or discuss the project as it develops.

#### Comment Requested

This notice of intent initiates the scoping process that guides development of the environmental impact statement.

#### Early Notice of Importance of Public Participation in Subsequent Environmental Review

A draft environmental impact statement will be prepared for comment. The comment period on the draft

environmental impact statement will be 45 days from the date the Environmental Protection Agency publishes the notice of availability in the **Federal Register**. The Forest Service believes, at this early stage, it is important to give reviewers notice of several court rulings related to public participation in the environmental review process. First, reviewers of draft environmental impact statements must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewer's position and contentions. *Vermont Yankee Nuclear Power Corp. v. NRDC*, 435 U.S. 519, 553 (1978). Also, environmental objections that could be raised at the draft environmental impact statement stage but that are not raised until after completion of the final environmental impact statement may be waived or dismissed by the courts. *City of Angoon v. Hodle*, 803 F.2d 1016, 1022 (9th Cir. 1986) *Wisconsin Heritages, Inc. v. Harris*, 490 F. Supp. 1334, 1338 (E.D. Wis. 1980). Because of these court rulings, it is very important that those interested in this proposed action participate by the close of the 45 day comment period so that substantive comments and objections are made available to the Forest Service at a time when it can meaningfully consider them and respond to them in the final environmental impact statement.

To assist the Forest Service in identifying and considering issues and concerns on the proposed action, comments on the draft environmental impact statement should be as specific as possible. It is also helpful if comments refer to specific pages or chapters of the draft statement. Comments may also address the adequacy of the draft environmental impact statement or the merits of the alternatives formulated and discussed in the statement. Reviewers may wish to refer to the Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3 in addressing these points.

(Authority: 40 CFR 1501.7 and 1508.22; Forest Service Handbook 1909.15, Section 21)

Dated: September 12, 2003.

**Bruce E. Bernhardt,**

*Nez Perce Forest Supervisor.*

## DEPARTMENT OF AGRICULTURE

### Forest Service

#### **Challis and Salmon-Cobalt Ranger Districts, Salmon-Challis National Forest; Idaho; Morgan Creek and Eddy Creek Grazing Allotments Environmental Impact Statement**

**AGENCY:** Forest Service, USDA.

**ACTION:** Notice of intent to prepare an environmental impact statement.

**SUMMARY:** The Challis and Salmon-Cobalt Ranger Districts propose to update the livestock grazing plans for the Morgan Creek and Eddy Creek Cattle and Horse grazing allotments. The allotments are located 4 to 28 miles north to northwest of Challis, Idaho.

**DATES:** Comments concerning the scope of the analysis must be received by October 27, 2003. The draft environmental impact statement is expected February 2005 and the final environmental impact statement is expected June 2005.

**ADDRESSES:** Send written comments to Ken Rodgers, Environmental Coordinator, Challis Ranger District, H/C 63, Box 1669, Challis, Idaho 83226.

A public meeting will be conducted at the Challis Ranger District Office, Hwy 93 North, Challis, Idaho on October 8, 2003, starting at 6 p.m.

**FOR FURTHER INFORMATION CONTACT:** Ken Rodgers, Environmental Coordinator, Challis Ranger District, H/C 63, Box 1669, Challis, Idaho 83226, or e-mail [kr Rodgers@fs.fed.us](mailto:kr Rodgers@fs.fed.us).

#### **SUPPLEMENTARY INFORMATION:**

##### **Purpose and Need for Action**

This proposal, in part, is to comply with Public Law 104-19, section 504(a): establish and adhere to a schedule for the completion of National Environmental Policy Act (NEPA) of 1969 (42 U.S.C. 4321 *et seq.*) analysis and decision on all grazing allotments within the National Forest System unit for which NEPA is needed (Pub. L. 104-19, General Provision 1995). Upon completion of the NEPA analysis and decisions for the allotments, the terms and conditions of existing grazing permits will be modified, as necessary, to conform to such NEPA analysis. In addition, the purpose of the proposed action is to improve range condition and trend and achieve desired conditions within the project area through livestock grazing.

##### **Proposed Action**

The proposed action is to authorize continued livestock grazing, provide analysis and data to update allotment
