Also, on pages 51970 through 51972 of the **Federal Register** notice, the Computer Requirements for the MBDC Program have been amended to reflect the following changes:

1. Under the heading *Network Design*:

- The term "server-based local area network" has been substituted for "Client Server" for clarity;
- The requirement for a service pack 3 or greater server has been deleted;
- The requirement for a Domain Controller server has been deleted;
- Grant recipients may use a Pentium IV class CPU, instead of a Pentium IV CPU; and
- The requirement for a trusted relationship between the servers of MBDA's and the award recipient's has been deleted.

2. Under the heading *Desktop Workstations*:

- Grant recipients may use a Pentium IV class CPU, instead of a Pentium IV CPU;
- The option of XP Professional software has been added to Operating systems;
- A requirement for a software or hardware-based Firewall has been added to the antivirus protection software; and
- The requirement that 50% of all employee workstations to be fully operational during business hours, has been deleted.

3. Under the heading *Maintenance and Security*:

- The requirement for a trusted relationship for any security component has been deleted.

4. Under the heading *Time for Compliance*:

- The requirement for the contact information for the ISP Technical Contact has been deleted.

The amended Computer Requirements reads as follows:
