

Plan in accordance with its NEPA regulations (10 CFR 1021.331(a)), which will serve as a tool for monitoring mitigation commitments.

Decision

DOE will implement the Proposed Action of providing approximately \$60 million in cost-shared federal funding support to design, construct, and demonstrate the co-feed BGL technology proposed by KPE. The project is intended to demonstrate the combined removal of SO₂, NO_x, and particulate matter in a BGL co-feed technology at a size (540 MW) approximately 40 to 50 percent larger than other currently operating, 100 percent coal-fed gasifier systems. The project is expected to generate sufficient data from design, construction, and operation to allow private industry to assess the potential for commercial application of the larger scale co-feed BGL technology. This decision to provide cost-shared funding for the proposed project was made after careful review of the potential environmental impacts, as analyzed in the EIS.

DOE's decision incorporates all practicable means to avoid or minimize environmental harm. In accordance with Section 1021.331(a) of the DOE NEPA regulations, DOE will prepare a Mitigation Action Plan that addresses mitigation commitments expressed in this ROD. Copies of the Mitigation Action Plan may be obtained from Roy Spears, NEPA Document Manager, U.S. Department of Energy, National Energy Technology Laboratory, 3610 Collins Ferry Road, Morgantown, WV 26507; telephone: (304) 285-5460.

Issued in Washington, DC on, this 29th day of January 2003.

Carl Michael Smith,

Assistant Secretary for Fossil Energy.
