The petitions were submitted pursuant to Section 251 of the Trade Act of 1974 (19 U.S.C. 2341). Consequently, the United States Department of Commerce has initiated separate investigations to determine whether increased imports into the United States of articles like or directly competitive with those produced by each firm contributed importantly to total or partial separation of the firm's workers, or threat thereof, and to a decrease in sales or production of each petitioning firm. Any party having a substantial interest in the proceedings may request a public hearing on the matter. A request for a hearing must be received by Trade Adjustment Assistance, Room 7315, Economic Development Administration, U.S. Department of Commerce, Washington, DC 20230, no later than the close of business of the tenth calendar day following the publication of this notice.

The Catalog of Federal Domestic Assistance official program number and title of the program under which these petitions are submitted is 11.313, Trade Adjustment Assistance.

Dated: September 26, 2003.

#### SUPPLEMENTARY INFORMATION:

##### I. Abstract

The International Trade Administration, Import Administration, AD/CVD Enforcement, implements the U.S. antidumping and countervailing duty law. Import Administration investigates allegations of unfair trade practices by foreign governments and producers and, in conjunction with the U.S. International Trade Commission, can impose duties on the product in question to offset the unfair practices. Form ITA-366P—Format for Petition Requesting Relief Under the U.S. Countervailing Duty Law—is designed for U.S. companies or industries that are unfamiliar with the Countervailing law and the petition process. The Form is designed for potential petitioners that believe a foreign competitor is being subsidized unfairly. Since a variety of detailed information is required under the law before initiation of a countervailing duty investigation, the Form is designed to extract such information in the least burdensome manner possible.
