

haulout will also be provided. A draft interim report must be submitted to NMFS by April 30, 2004.

Because seismic retrofit activities may continue beyond the date of expiration of this IHA (presumably under a new IHA), a draft final report must be submitted to the Regional Administrator within 90 days after the expiration of this IHA. A final report must be submitted to the Regional Administrator within 30 days after receiving comments from the Regional Administrator on the draft final report. If no comments are received from NMFS, the draft final report will be considered to be the final report.

CALTRANS will provide NMFS with a follow-up report on the post-construction monitoring activities within 18 months of project completion in order to evaluate whether haulout patterns are similar to the pre-retrofit haul-out patterns at Castro Rocks.

### National Environmental Policy Act

NMFS prepared an EA in 1997 that concluded that the impacts of CALTRANS' seismic retrofit construction of the Richmond-San Rafael Bridge will not have a significant impact on the human environment. A copy of that EA, which includes the Finding of No Significant Impact (FONSI) is available upon request (see ADDRESSES). This action has not changed significantly from the action analyzed in the 1997 EA. Therefore, this proposed action is not expected to change the analysis or conclusion of the 1997 EA.

### Endangered Species Act (ESA)

Under section 7 of the ESA, NMFS has begun consultation on the proposed issuance of an IHA under section 101(a)(5)(D) of the MMPA for this activity. Consultation will be concluded upon completion of the comment period for this proposed action and consideration of those comments prior to a determination on issuance of an IHA.

### Preliminary Conclusions

NMFS has preliminarily determined that the short-term impact of the seismic retrofit construction of the Bridge, as described in this document, should result, at worst, in the temporary modification in behavior by small numbers of harbor seals and, possibly, by small numbers of California sea lions. While behavioral modifications, including temporarily vacating the haulout, may be made by these species to avoid the resultant visual and acoustic disturbance, this action is expected to have a negligible impact on

the animals. In addition, no take by injury and/or death is anticipated, and harassment takes will be at the lowest level practicable due to incorporation of the mitigation measures mentioned previously in this document.

### Proposed Authorization

NMFS proposes to renew an IHA to CALTRANS for the potential harassment of small numbers of harbor seals and California sea lions incidental to seismic retrofit construction of the Bridge, provided the previously mentioned mitigation, monitoring, and reporting requirements are incorporated. NMFS has preliminarily determined that the proposed activity would result in the harassment of only small numbers of harbor seals and possibly

California sea lions and will have no more than a negligible impact on these marine mammal stocks.

### Information Solicited

NMFS requests interested persons to submit comments, information, and suggestions concerning this request (see ADDRESSES). Prior to submitting comments, NMFS recommends reviewers of this document read the responses to comments made previously (see 62 FR 67045, December 23, 1997; 65 FR 2375, January 14, 2000; 66 FR 49165, September 26, 2001; and 67 FR 61323, September 30, 2002) for this action, as NMFS does not intend to address these issues further without the submission of additional scientific information.
