

The evaluation plan should be appropriate to the type of project proposed. For example:

(a) *Research.* An evaluation approach suited to many research projects is a review by an advisory panel of the research methodology, data collection instruments, preliminary analyses, and products as they are drafted. The panel should be comprised of independent researchers and practitioners representing the perspectives affected by the proposed project.

(b) *Education and Training.* The most valuable approaches to evaluating educational or training programs reinforce the participants' learning experience while providing useful feedback on the impact of the program and possible areas for improvement. One appropriate evaluation approach is to assess the acquisition of new knowledge, skills, attitudes, or understanding through participant feedback on the seminar or training event. Such feedback might include a self-assessment of what was learned along with the participant's response to the quality and effectiveness of faculty presentations, the format of sessions, the value or usefulness of the material presented, and other relevant factors. Another appropriate approach would be to use an independent observer who might request both verbal and written responses from participants in the program. When an education project involves the development of curricular materials, an advisory panel of relevant experts can be coupled with a test of the curriculum to obtain the reactions of participants and faculty as indicated above.

(c) *Demonstration.* The evaluation plan for a demonstration project should encompass an assessment of program effectiveness (e.g., how well did it work?); user satisfaction, if appropriate; the cost-effectiveness of the program; a process analysis of the program (e.g., was the program implemented as designed, and/or did it provide the services intended to the targeted population?); the impact of the program (e.g., what effect did the program have on the court, and/or what benefits resulted from the program?); and the replicability of the program or components of the program.

(d) *Technical Assistance.* For technical assistance projects, applicants should explain how the quality, timeliness, and impact of the assistance provided would be determined, and develop a mechanism for feedback from both the users and providers of the technical assistance.

Evaluation plans involving human subjects should include a discussion of

the procedures for obtaining respondents' informed consent, ensuring the respondents' privacy and freedom from risk or harm, and protecting others who are not the subjects of the evaluation but would be affected by it. Other than the provision of confidentiality to respondents, human subject protection issues ordinarily are not applicable to participants evaluating an education program.

e. *Project Management.* The applicant should present a detailed management plan, including the starting and completion date for each task; the time commitments to the project of key staff and their responsibilities regarding each project task; and the procedures that would ensure that all tasks are performed on time, within budget, and at the highest level of quality. In preparing the project time line, Gantt Chart, or schedule, applicants should make certain that all project activities, including publication or reproduction of project products and their initial dissemination, would occur within the proposed project period. The management plan must also provide for the submission of Quarterly Progress and Financial Reports within 30 days after the close of each calendar quarter (i.e., no later than January 30, April 30, July 30, and October 30).

Applicants should be aware that the Institute is unlikely to approve more than one limited extension of the grant period. Therefore, the management plan should be as realistic as possible and fully reflect the time commitments of the proposed project staff and consultants.

f. *Products.* The program narrative in the application should contain a description of the products to be developed (e.g., training curricula and materials, videotapes, articles, manuals, or handbooks), including when they would be submitted to the Institute. The budget should include the cost of producing and disseminating the product to each in-State SJI library (See appendix C), State chief justice, State court administrator, and other appropriate judges or court personnel.

(1) *Dissemination Plan.* The application must explain how and to whom the products would be disseminated; describe how they would benefit the State courts, including how they could be used by judges and court personnel; identify development, production, and dissemination costs covered by the project budget; and present the basis on which products and services developed or provided under the grant would be offered to the courts community and the public at large (i.e.,

whether products would be distributed at no cost to recipients, or if costs are involved, the reason for charging recipients and the estimated price of the product) (see section VIII.A.11.b.). Ordinarily, applicants should schedule all product preparation and distribution activities within the project period.

A copy of each product must be sent to the library established in each State to collect the materials developed with Institute support. (A list of these libraries is contained in appendix C.) Applicants proposing to develop web-based products should provide for sending a hard-copy document to the SJI-designated libraries and other appropriate audiences to alert them to the availability of the web site or electronic product (i.e., a written report with a reference to the web site).

Fifteen (15) copies of all project products must be submitted to the Institute, along with an electronic version in .html or .pdf format.

(2) *Types of Products and Press Releases.* The type of product to be prepared depends on the nature of the project. For example, in most instances, the products of a research, evaluation, or demonstration project should include an article summarizing the project findings that is publishable in a journal serving the courts community nationally, an executive summary that would be disseminated to the project's primary audience, or both. Applicants proposing to conduct empirical research or evaluation projects with national import should describe how they would make their data available for secondary analysis after the grant period. (See section VIII.A.14.a.).

The curricula and other products developed through education and training projects should be designed for use outside the classroom so that they may be used again by the original participants and others in the course of their duties.

In addition, recipients of project grants must prepare a press release describing the project and announcing the results, and distribute the release to a list of national and State judicial branch organizations. SJI will provide press release guidelines and a list of recipients to grantees at least 30 days before the end of the grant period.

(3) *Institute Review.* Applicants must submit a final draft of all written grant products to the Institute for review and approval at least 30 days before the products are submitted for publication or reproduction. For products in a videotape or CD-ROM format, applicants must provide for Institute review of the product at the treatment, script, rough-cut, and final stages of
