

Approval of the direct final rule will eliminate this problem and is consistent with previous NRC actions. Further, the direct final rule will have no adverse effect on public health and safety. This direct final rule has no significant identifiable impact or benefit on other Government agencies. Based on this discussion of the benefits and impacts of the alternatives, the NRC concludes that the requirements of the direct final rule are commensurate with the NRC's responsibilities for public health and safety and the common defense and security. No other available alternative is believed to be as satisfactory, and thus, this action is recommended.

Regulatory Flexibility Certification

In accordance with the Regulatory Flexibility Act of 1980 [5 U.S.C. 605(b)], the NRC certifies that this rule will not, if issued, have a significant economic impact on a substantial number of small entities. This direct final rule affects only the licensing and operation of nuclear power plants, independent spent fuel storage facilities, and Transnuclear, Inc. The companies that own these plants do not fall within the scope of the definition of "small entities" set forth in the Regulatory Flexibility Act or the Small Business Size Standards set out in regulations issued by the Small Business Administration at 13 CFR part 121.

Backfit Analysis

The NRC has determined that the backfit rule (10 CFR 50.109 or 10 CFR 72.62) does not apply to this direct final rule because this amendment does not involve any provisions that would impose backfits as defined. Therefore, a backfit analysis is not required.

Small Business Regulatory Enforcement Fairness Act

In accordance with the Small Business Regulatory Enforcement Fairness Act of 1996, the NRC has determined that this action is not a major rule and has verified this determination with the Office of Information and Regulatory Affairs, Office of Management and Budget.

FEDERAL RESERVE SYSTEM

12 CFR Part 204

[Regulation D; Docket No. R–1163]

Reserve Requirements of Depository Institutions

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Final rule.

SUMMARY: The Board is amending Regulation D, Reserve Requirements of Depository Institutions to reflect the annual indexing of the low reserve tranche and of the reserve requirement exemption amount for 2004. The Board is also announcing the annual indexing of the deposit cutoff level and the reduced reporting limit that will be effective beginning in September 2004. The Regulation D amendments increase the amount of net transaction accounts at each depository institution that are subject to a three percent reserve requirement in 2004 from \$42.1 million to \$45.4 million. This amount is known as the low reserve tranche. The Regulation D amendments also increase the amount of total reservable liabilities of each depository institution that are subject to a zero percent reserve requirement in 2004 from \$6.0 million to \$6.6 million. This amount is known as the reserve requirement exemption amount. The adjustments to both of these amounts are derived using statutory formulas specified in the Federal Reserve Act. The Board is also announcing increases in two other amounts, the deposit cutoff level and the reduced reporting limit, that are used to determine the frequency with which depository institutions must
