We used the same logic for seafood as we did for produce to account for the possibility of having to resubmit prior notice: A change in the type of seafood in the shipment made after the original notice was submitted, less than 1 hour before scheduled arrival, would lead to a reduction in value. We use the reduction in the value of perishable

imported seafood to account for the cost of a wait at the border while prior notice is resubmitted. Then, assuming that perishable seafood will keep for 2 days in a consumer's refrigerator (Ref. 10), we find that a 1-hour wait caused by the prior notice requirement for 2.5 percent of the products would result in a 2.1 percent loss in that seafood's value (1 hour out of 48 hours). The lost time

would result in a \$59,000 loss in value of Mexican perishable seafood imports and a \$978,000 loss in value of Canadian perishable seafood imports.

Table 11 of this document shows the loss in value caused by the resubmitted prior notice information for the 2.5 percent of imported Mexican and Canadian fresh seafood and produce affected.

Table 12 of this document presents a summary of the costs associated with option 2. Also presented in table 12 of this document are the present values of the costs associated with this option, calculated using the OMB-

recommended discount rates of 3 and 7 percent.

The first 6 rows of the summary table are the same for options 2 through 9. The options differ only in the time set for prior notice and revisions; the

differences in cost across options arise from differences in the lost value of produce and seafood, and in some options, the cost of truck time.
