

request for a scientific research permit to take "the species identified above" had been submitted by the above-named individual. The requested permit has been issued under the authority of the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 *et seq.*), the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR part 216).

The purpose of the research is to assess the health of the Northeast Atlantic harbor seal population residing along the coast of Maine. The permit authorizes the applicant to take up to 200 harbor seals annually by capture, and physically restrain and sample 20 young of the year pups. Morphometric measurements, samples of blood, feces, and skin biopsies will be taken, and flipper tags attached. Annually, up to 10 pups will have satellite tags attached to allow movement tracking and behavioral analysis. Accidental mortality of 2 harbor seals annually is authorized. Accidental capture and immediate release of 5 gray seals, 3 harp seals, and 3 hooded seals annually is also authorized. Additionally, Level B Harassment (disturbance of animals on haul-outs) is authorized for 400 harbor seals, 5 grey seals, 3 harp seals and 3 hooded seals annually. The research will study movement and migration patterns for young of the year pups. The movements, disease load, survival and behavior of wild-caught pups will be compared with rehabilitated pups from the same population and cohort to determine baseline "normal" behavior. The Permit will expire September 30, 2008.
