1. Information about local and state ATV use restrictions, regulations and licensing activities and their impact upon ATV safety.
2. Current ATV use patterns (recreational, industrial, agricultural, or other uses), injuries and safety issues related to those specific uses.
3. Information from ATV owners and users regarding ATV use, safety issues, accidents and injuries, minimum riding and purchasing age requirements, and future government action.
4. Current local, state and industry safety efforts and training programs.
5. Information from ATV manufacturers and dealers regarding the availability and use of safety training for ATV purchasers, and ATV consumer purchasing patterns (age, model type and size, experienced vs. inexperienced riders, etc.).
6. Whether factors such as the rider's age, ATV engine size, and/or the large used ATV sales market (or any other factors) have influenced the increase in injuries and deaths observed by the Commission staff during its recent ATV risk analysis study.
7. Whether there should be a performance standard for ATVs and what requirements related to safety should be included.

SUPPLEMENTARY INFORMATION:

A. Purpose

To protect the Government's interest and to ensure timely delivery of items of the requisite quality, contracting officers, prior to award, must make an affirmative determination that the prospective contractor is responsible, *i.e.*, capable of performing the contract. Before making such a determination, the contracting officer must have in his possession or must obtain information sufficient to satisfy himself that the prospective contractor (i) has adequate financial resources, or the ability to obtain such resources, (ii) is able to comply with required delivery schedule, (iii) has a satisfactory record of performance, (iv) has a satisfactory record of integrity, and (v) is otherwise qualified and eligible to receive an award under appropriate laws and regulations. If such information is not in the contracting officer's possession, it is obtained through a preaward survey conducted by the contract administration office responsible for the plant and/or the geographic area in which the plant is located. The necessary data is collected by contract administration personnel from available data or through plant visits, phone calls, and correspondence and entered on Standard Forms 1403, 1404, 1405, 1406, 1407, and 1408 in detail commensurate with the dollar value and complexity of the procurement. The information is used by Federal contracting officers to determine whether a prospective contractor is responsible.
