SUPPLEMENTARY INFORMATION: The requested modifications have been granted under the authority of the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*) and the provisions of § 222.306 of the regulations governing the taking, importing, and exporting of endangered and threatened fish and wildlife (50 CFR 222-226).

NFWFL is authorized to possess samples of ESA-listed non-marine mammal and non-reptilian species under NMFS jurisdiction associated with genetic research studies and support of law enforcement actions. Law enforcement personnel have an ongoing need for scientific assistance in cases concerning endangered, protected, and managed marine species. The Fish and Wildlife Forensics Center provides technical/scientific assistance to a variety of law enforcement agencies including NMFS Enforcement, US Customs, US Fish and Wildlife Service as well as state wildlife enforcement agencies. Forensics analyses generally involve a biochemical or genetic test when a comparison is made between evidence and voucher samples. Voucher samples which are used in a forensics analysis are collected and maintained under strict criteria that includes documentation (species identification form) from the expert who has authenticated the samples; a chain of custody which originates with the sample collection; and storage under secure conditions. The issuance of this modification will extend the authorized activities through December 31, 2004.

Issuance of these modifications, as required by the ESA was based on a finding that such permits: (1) Were applied for in good faith; (2) will not operate to the disadvantage of the endangered species which is the subject of these permits; and (3) are consistent
