

level radioactive waste disposal facility in Clive, Utah. Cleanup activities were conducted in full compliance with applicable Federal and State waste management and transportation requirements.

Radiological decontamination of the Ventron site by the DOE occurred in two phases: In September 1995, and from May 1996 to March 1997. Supplemental sampling of the site to verify the adequacy of radiological remediation was performed in July 1997.

In September 1995, the first phase of DOE remediation of site tidal flats (harbor) adjacent to the seawall began. During this first phase of remediation, a walkover was performed over the entire harbor down to the low-tide mark, and areas with elevated levels of radioactive materials were targeted for remediation. Elevated readings were found in three areas. Excavations were completed in the first two areas, and post-remedial action samples were collected.

Excavation was halted in the third area because contamination in that area was too extensive to be removed by manual methods. During the second phase of the remedial action, this third area was remediated and post-remedial action samples were collected.

Pursuant to the MOA between DOE and Morton International, several onsite buildings were demolished and the crushed building rubble was sampled. Rubble meeting DOE guidelines contained in DOE Order 5400.5 was stockpiled and used as backfill along the seawall. Building slabs were surveyed and either decontaminated and left in place or removed and disposed of with other contaminated material.

Excavation of contaminated materials was the primary remedial action technique used at the Ventron site. Eleven discrete areas of the site were excavated and verified for compliance with radiological cleanup criteria. Excavations occurred beneath demolished buildings, in the northwest corner of the site, and in the harbor area.

Post-remedial action surveys conducted in 1996 and 1997 have demonstrated, and DOE has certified, that the subject property is in compliance with DOE radiological decontamination criteria and standards in effect at the conclusion of remedial action. These criteria and standards are established to protect members of the general public and occupants of the site and to ensure that reasonably foreseeable future use of the site will result in no radiological exposure above applicable guidelines. Accordingly, this property is released from the FUSRAP program. These findings are supported by the DOE's Certification Docket for the

Remedial Action Performed at the Ventron site in Beverly, Massachusetts. DOE makes no representation regarding the condition of the site as a result of activities conducted subsequent to DOE's post-remedial action surveys.

The certification docket will be available for review between 9 a.m. and 4 p.m., Monday through Friday (except Federal holidays), in the DOE Public Reading Room located in Room 1E-190 of the Forrestal Building, 1000 Independence Avenue, SW., Washington, DC. Copies of the certification docket will also be available in the DOE Information Center, 475 Oak Ridge Turnpike, Oak Ridge, Tennessee, 37831, and the Beverly Public Library, 32 Essex Street, Beverly, Massachusetts, 01915.

The DOE, through the Office Director, Ohio Office (EM-31), Deputy Assistant Secretary for Office of Site Closure (EM-30), the Assistant Secretary for the Office Environmental Management (EM), has issued the following statement:

Statement of Certification: Ventron Site in Beverly, Massachusetts

The DOE, Oak Ridge Operations Office (OR), Office of Environmental Management, Oak Ridge Reservation, Remediation Management Group, and the U.S. DOE Office of Environmental Management (EM), Office of Site Closure (EM-30), Ohio Office (EM-31), has reviewed and analyzed the radiological data obtained following remedial action at the Ventron site in Beverly, Massachusetts, (Deed Book 10091, Page 339, in the records of Essex County, Massachusetts). Based on the analysis of all data collected, including post-remedial action surveys, DOE certifies that any residual contamination remaining onsite at the time remedial actions were completed falls within DOE radiological decontamination criteria and standards for use of the property without radiological restrictions. This certification of compliance provides assurance that reasonably foreseeable future use of the site will result in no radiological exposure above DOE radiological criteria and standards for protecting members of the general public and occupants of the property.

Property owned by: Morton International, Incorporated, 123 North Wacker Drive, Chicago, Illinois, 60606.

Issued in Germantown, Maryland.

Sally A. Robison,

Office Director, Ohio Office, Office of Site Closure.

BILLING CODE 6450-01-P

DEPARTMENT OF ENERGY

Energy Information Administration

Agency Information Collection Activities: Submission for OMB Review; Comment Request

AGENCY: Energy Information Administration (EIA), Department of Energy (DOE).

ACTION: Agency information collection activities: Submission for OMB review; comment request.

SUMMARY: The EIA has submitted the Petroleum Supply Reporting System surveys to the Office of Management and Budget (OMB) for review and a three-year extension under section 3507(h)(1) of the Paperwork Reduction Act of 1995 (Pub. L. 104-13) (44 U.S.C. 3501 *et seq.*).

DATES: Comments must be filed by November 20, 2003. If you anticipate that you will be submitting comments but find it difficult to do so within that period, you should contact the OMB Desk Officer for DOE listed below as soon as possible.

ADDRESSES: Send comments to Bill Nickerson, OMB Desk Officer for DOE, Office of Information and Regulatory Affairs, Office of Management and Budget. To ensure receipt of the comments by the due date, submission by FAX (202-395-7285) or e-mail (William_Nickerson@omb.eop.gov) is recommended. The mailing address is 726 Jackson Place NW., Washington, DC 20503. The OMB DOE Desk Officer may be telephoned at 202-395-7151 (A copy of your comments should also be provided to EIA's Statistics and Methods Group at the address below.)

FOR FURTHER INFORMATION CONTACT: Requests for additional information should be directed to Herbert Miller. To ensure receipt of the comments by the due date, submission by FAX (202-287-1705) or e-mail (herbert.miller@eia.doe.gov) is recommended. The mailing address is Statistics and Methods Group (EI-70), Forrestal Building, U.S. Department of Energy, Washington, DC 20585-0670. Mr. Miller may be contacted by telephone at (202) 287-1711.

SUPPLEMENTARY INFORMATION: This section contains the following information about the energy information collection submitted to OMB for review: (1) The collection numbers and title; (2) the sponsor (*i.e.*, the Department of Energy component); (3) the current OMB docket number (if applicable); (4) the type of request (*i.e.*, new, revision, extension, or reinstatement); (5) response obligation
