

television (LPTV) station to request a four-letter call sign after receiving its construction permit. All initial LPTV construction permits will continue to be issued with a five-character LPTV call sign. LPTV respondents are required to use the on-line electronic system. To enable these respondents to use this on-line system, the Commission eliminated the requirement that holders of LPTV construction permits submit with their call sign requests a certification that the station has been constructed, that physical construction is underway at the transmitter site, or that a firm equipment order has been placed. (All burden associated with call sign requests for the on-line reservation and authorization system are included in information collection 3060-0188.) 47 CFR 74.783(b) requires licensees of television translators whose station identification is made by the television station whose signals are being rebroadcast by the translator, must secure agreement with this television licensee to keep in its file, and available to FCC personnel, the translator's call letters and location, giving the name, address and telephone number of the licensee or service representative to be contacted in the event of malfunction of the translator.
