

Transmittal No. 03-24

**Notice of Proposed Issuance of Letter of Offer
Pursuant to Section 36(b)(1)
of the Arms Export Control Act**

**Annex
Item No. vii**

(vii) Sensitivity of Technology:

1. The M88A2 recovery vehicles includes the following classified or sensitive components:

a. This AVDS-1790-8CR Engine Propulsion System is an unique modification to the standard piston engine family found in the M60 series and the base M88A1. Manufacturing processes associated with the production of turbochargers, fuel injection system, and cylinders are proprietary, and therefore, commercially competition sensitive.

b. Hydraulic System - Use of commercially available hydraulic components is not entirely unique in the armored vehicle world. None of the subcomponents of the system are classified. Manufacturing processes associated with winches, hydraulic motors, control valves, and the like are proprietary and therefore, commercially competition sensitive.

2. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures which might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

3. A determination has been made that Egypt can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.
