### **Part 3710—Public Law 167; Act of July 23, 1955**

#### *Subpart 3711—Common Varieties*

In the proposed rule, the contents of this section were shown in the “crosswalk table” as being moved to new part 3830, section 3830.12. However, in the proposed rule, we inadvertently neglected to remove the old subpart 3711 from the text of the regulations. Since we have moved all of the substantive material defining uncommon varieties of mineral materials to the proposed and final section 3830.12, we are removing the heading of subpart 3711 in this final rule as redundant.

### **Part 3730—Public Law 359; Mining in Powersite Withdrawals: General**

We amended cross references in section 3734.1 to reflect the reorganization of part 3830. No public comments addressed this part.

### **Part 3810—Lands and Minerals Subject to Location**

#### *Subpart 3812—Minerals Under the Mining Law*

In the proposed rule, we removed this subpart describing minerals that are subject to location. You will find this information in section 3830.11 “Which minerals are locatable under the mining law?” in the final rule. A number of comments addressed this subject, but they were directed at new section 3830.12. We will address them under that heading.

### **Part 3820—Areas Subject to Special Mining Laws**

#### *Subpart 3821—O and C Lands*

We amended cross references in sections 3821.2 and 3821.3 to reflect the reorganization of part 3830. No comments addressed this subpart.

### **Part 3830—Locating, Recording, and Maintaining Mining Claims or Sites; General Provisions**

Sections 3830.1 through 3830.94 of this final rule contain provisions that generally apply to all the regulations in parts 3830 through 3839. You should refer back to these sections on general policies and procedures when you follow regulations in the subsequent parts.

Sections 3830.1, 3830.2, and 3830.3 outline the purpose, scope, and authority for this part. Section 3830.5 contains definitions that are important to understand in this series of parts. Section 3830.8 discusses information collection requirements. Section 3830.9 describes the penalties for submitting a document to BLM that you know contains false, erroneous, or fictitious information or statements.

Section 3830.11 and 3830.12 describe which minerals are locatable under the mining law and subject to these regulations.

Sections 3830.20 through 3830.25 explain payment procedures for various fees and service charges required in part 3830. Section 3830.21 contains a table describing the fees and service charges and when they are due. Section 3830.22 describes when BLM will refund fees you have paid. Section 3830.23 explains the forms of payment BLM will accept. Section 3830.24 tells you how you can get your payments to BLM. Section 3830.25 explains when you should pay for a new location.

Sections 3830.91 through 3830.96 describe what happens if you fail to comply with the regulations, the types of defects that may affect claims and sites, and the procedures you must follow if you want to cure defects. Section 3830.97 describes appeal procedures and includes cross references to other regulations, including appeals regulations found in parts 4 and 1840 of this title, that state procedures for appealing to the Interior Board of Land Appeals.

In addition to this general section on defects, most parts also contain sections xxxx.90 through xxxx.9x, which identify the types of common errors that are specific to that part, and tell you whether you can correct them and how to do so.

#### *Subpart A—Introduction*

#### *Section 3830.1 What Is The Purpose of These Regulations?*

We added language to paragraph (b) in the final rule to remind you that to the extent a state law conflicts with these regulations, you must comply with these regulations. We also recast
