

agencies, such as the Export-Import Bank and the Overseas Private Investment Corporation; and multilateral development banks, such as the World Bank, Asian Development Bank, and others. To facilitate contact between exporters and financial institutions, the Office of Finance has developed an interactive INTERNET trade finance matchmaking program to link exporters seeking trade finance with banks and other financial institutions. The information collected from financial institutions regarding the trade finance products and services they offer will be compiled into a database. An exporter will be able to electronically submit a form identifying the potential export transaction and type of financing requested. This information will be electronically matched with the financial institution(s) that meet the requirements of the exporter. After a match has been made, a message will be electronically sent to both the exporter and the financial institution containing the information about the match, and contact information for either party to initiate communication. This program is designed to implement the Department of Commerce's goal of improving access to trade financing for small business exporters.
