

inoperative. Section 63.850 of the final standard includes these provisions, except that the existing performance specifications for continuous emission monitors (CEMs) are not applicable to hydrogen fluoride CEMs because such specifications have not yet been developed for that device. In addition, all sources are required to submit quarterly and semiannual reports.

Burden Statement: In the most previously approved ICR, the estimated number of respondents for the information collection was 23 with 50 responses per year, and the annual industry reporting and recordkeeping burden for this collection of information was 121,277 hours. On the average, each respondent reported two times per year and spent 2,416 hours preparing each response.

The total annualized cost over its expected useful life is approximately \$117,000, which is comprised of zero capital/startup costs and operation and maintenance costs of approximately \$117,000. It is estimated that no new sources per year will become subject to the standard, but one existing source per year will add a new affected facility.

(8) NESHAP for Epoxy Resin and Non-Nylon Polyamide Production (40 CFR Part 63, Subpart W); EPA Preliminary ICR Number 1681.05; OMB Control Number 2060-0290; expiration date September 30, 2004.

Affected Entities: Entities potentially affected by this action are all existing, new, and reconstructed manufacturers of basic liquid epoxy resins and epichlorohydrin-modified non-nylon polyamide resins, also known as wet strength resins.

Abstract: The NESHAP for Epoxy Resin and Non-Nylon Polyamide Production (40 CFR Part 63, Subpart W), was promulgated on March 8, 1995, and amended on May 8, 2000.

In general, all NESHAP standards require initial notifications, performance tests, and periodic reports, and owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative.

Burden Statement: In the most previously approved ICR, the estimated number of respondents for this information collection was 13 with 29 responses per year. The annual industry reporting and recordkeeping burden for this collection of information was 4,525 hours. On the average, each respondent reported two times per year and spent 156 hours preparing each response.

The total annualized cost over its expected useful life is approximately \$9,000, which is comprised of zero capital/startup costs and operation and maintenance costs of approximately \$9,000. It is estimated that no additional sources will become subject to the standard over the next three years.

(9) NSPS for Sewage Sludge Treatment Plants (40 CFR Part 60, Subpart O); EPA Preliminary ICR Number 1063.09; OMB Control Number 2060-0035; expiration date September 30, 2004.

Affected Entities: Entities potentially affected by this action are each incinerator that combusts wastes containing more than 10 percent sewage sludge (dry basis) produced by municipal sewage treatment plants, or each incinerator which charges more than 1000 kg (2205 lb.) per day municipal sewage sludge (dry basis).

Abstract: The NSPS for Sewage Treatment Plants (40 CFR Part 60, Subpart O) were promulgated on February 28, 1974, and amended October 6, 1975, November 10, 1977, October 6, 1988, and October 17, 2000. The monitoring, recordkeeping, and reporting requirements outlined in the standards are mandatory for compliance with 40 CFR Part 60, NSPS for sewage sludge treatment plant incinerators.

The control of emissions of particulate matter from sewage treatment plant incinerators requires not only the installation of properly designed equipment, but also the operation and maintenance of that equipment.

These standards require initial notification reports with respect to construction, modification, reconstruction, startups, shutdowns, and malfunctions. The standards also require reports on initial performance tests and semiannual reports of excess emissions are also required.

Burden Statement: In the most previously approved ICR, the estimated number of respondents for this information collection was 154 with 294 responses per year. The annual industry reporting and recordkeeping burden for this collection of information was 9,089 hours. On the average, each respondent reported two times per year and spent 31 hours preparing each response.

The total annualized cost over its expected useful life is approximately \$5,845,000. The total annualized capital/startup cost is \$700,000, and the annualized operation and maintenance costs are approximately \$5,145,000.

Dated: October 20, 2003.

Michael M. Stahl,

Director, Office of Compliance.

ENVIRONMENTAL PROTECTION AGENCY

[AMS-FRL-7582-4]

California State Motor Vehicle Pollution Control Standards; Request for Waiver of Federal Preemption; Opportunity for Public Hearing

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of opportunity for public hearing and comment.

SUMMARY: The California Air Resources Board (CARB) has notified the EPA that it has promulgated regulations controlling emissions from off-cycle aggressive driving and air-conditioning usage for motor vehicles under 8,501 pounds gross vehicle weight rating with a phase-in of the requirements commencing in the 2001 model year. By letter dated January 29, 1999, CARB requests that the EPA provide California with a waiver of Federal preemption under section 209(b) of the Clean Air Act, 42 U.S.C. 7543(b), for these new test procedures and standards. Specifically, CARB's regulations adopt the two supplemental federal test procedures (SFTP)—the US06, high-speed, high-acceleration test; and the SC03 air conditioner test, and associated certification standards. This notice announces that EPA has tentatively scheduled a public hearing concerning California's request and that EPA is accepting comments on CARB's request.

DATES: EPA has tentatively scheduled a public hearing for December 3, 2003, beginning at 10 a.m. EPA will hold a hearing only if a party notifies EPA by November 24, 2003, expressing its interest in presenting oral testimony regarding CARB's waiver request. By November 28, 2003, any person who plans to attend the hearing should call David Dickinson of the EPA's Certification and Compliance Division at (202) 564-9256, to learn if we will hold a hearing. Any party may submit written comments by December 3, 2003.

ADDRESSES: Comments may be submitted electronically, by mail, by facsimile, or through hand delivery/courier. Follow the detailed instructions as provided in section "B" of the **SUPPLEMENTARY INFORMATION** section. EPA will make available for public inspection at the Air and Radiation
