

Order is next in line to be delivered (or executed). Any unexecuted portion of a Preferred Order shall be returned to the entering NNMS Market Participant. If the Quoting Market Participant is not at the best bid/best offer when the Preferred Order is next in line to be delivered (or executed), the Preferred Order shall be returned to the entering NNMS Market Participant.

(c) If an NNMS Market Participant enters a Quote or Non-Directed Order that would result in NNMS either: (1) Delivering an execution to a Quoting Market Participant(s) or an NNMS Order Entry Firm that participates in the automatic-execution functionality of the system at a price substantially away from the current inside bid/offer in that security; or (2) delivering a Liability Order to a Quoting Market Participant(s) that participates in the order-delivery functionality of the system at a price substantially away from the current inside bid/offer in that security, the system shall instead process only those portions of the order that will not result in either an execution or delivery at a price substantially away from the current inside best bid/offer in the security and return the remainder to the entering party. For purposes of this subsection only, an execution or delivery based on a sell order shall be deemed to be substantially away from the current inside bid if it is to be done at a price lower than a break-price established by taking the inside bid, reducing it by 10% of the bid's value, and then subtracting \$0.01. For example, in a stock with a current inside bid of \$10.00, the maximum price at which a single sell order could be executed would be \$8.99 calculated as follows:  $(\$10.00 - (\$10.00 \times .10 \text{ e.g. } \$1) - \$0.01 = \$8.99)$ . For offers, an execution or delivery based on a buy order shall be deemed to be substantially away from the current inside offer if it is done at a price higher than a break-price established by taking the inside offer, adding 10% of the offer's value to it, and then adding \$0.01. For example, in a stock with a current inside offer of \$10.00, the highest price at which a single sell order could be executed would be \$11.01 calculated as follows:  $(\$10.00 + (\$10.00 \times .10 \text{ e.g. } \$1) + \$0.01 = \$11.01)$ .

(C) through (D) No Change.

(2) Refresh Functionality.

(A) Reserve Size Refresh—Once a Nasdaq Quoting Market Participant's or NNMS Order Entry Firm's Displayed Quote/Order size on either side of the market in the security has been decremented to an amount less than one normal unit of trading due to NNMS processing, Nasdaq will refresh the

displayed size out of Reserve Size to a size-level designated by the Nasdaq Quoting Market Participant or NNMS Order Entry Firm, or in the absence of such size-level designation, to the automatic refresh size. The amount of shares taken out of reserve to refresh display size shall be added to any shares remaining in the Displayed Quote/Order and shall be of an amount that when combined with the number of shares remaining in the Nasdaq Quoting Market Participant's Displayed Quote/Order before it is refreshed will equal the displayed size-level designated by the Nasdaq Quoting Market Participant or, in the absence of such size-level designation, to the automatic refresh size. If there are insufficient shares available to produce a Displayable Quote/Order, the Nasdaq Quoting Market Participant's Quote/Order, and any odd-lot remainders, will be refreshed, updated, or retained, in conformity with NNMS Rules 4707 and 4710 as appropriate. To utilize the Reserve Size functionality, a minimum of 100 shares must initially be displayed in the Nasdaq Quoting Market Participant's or NNMS Order Entry Firm's Displayed Quote/Order, and the Displayed Quote/Order must be refreshed to at least 100 shares. This functionality will not be available for use by UTP Exchanges.

(B) Auto Quote Refresh ("AQR")—No Change.

(3) Entry of Locking/Crossing Quotes/Orders The system shall process locking/crossing Quotes/Orders as follows:

(A) Locked/Crossed Quotes/Orders During Market Hours—If during market hours, a [Quoting Market] [P]participant enters into the NNMS a Quote/Order that will lock/cross the market (as defined in NASD Rule 4613(e)), the system will not display the Quote/Order as a quote in Nasdaq; instead the system will treat the Quote/Order as a marketable limit order and enter it into the system as a Non-Directed Order for processing (consistent with subparagraph (b) of this rule) as follows:

(i) For locked-market situations, the order will be routed to the Quoting Market Participant or NNMS Order Entry Firm next in queue who would be locked, and the order will be executed (or delivered for execution) at the lock price;

(ii) For crossed-market situations, the order will be entered into the system and routed to the next Quoting Market Participants or NNMS Order Entry Firms in queue who would be crossed, and the order will be executed (or delivered for execution) at the price of the Displayed

Quote/Order that would have been crossed.

Once the lock/cross is cleared, if the participant's order is not completely filled, the system will reformat the order and display it in Nasdaq (consistent with the parameters of the Quote/Order) as a Quote/Order on behalf of the entering Quoting Market Participant or Order Entry Firm.

(B) No Change.

(4) through (8) No Change.

(c) No Change.

(d) NNMS Order Entry Firms.

All entries in NNMS shall be made in accordance with the procedures and requirements set forth in the NNMS User Guide and these rules. Orders may be entered in NNMS by the NNMS Order Entry Firm through either its Nasdaq terminal or computer interface. The system will transmit to the firm on the terminal screen and printer, if requested, or through the computer interface, as applicable, an execution report generated immediately following the execution.

(e) No Change.

## II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, Nasdaq included statements concerning the purpose of, and basis for, the proposed rule change, as amended, and discussed any comments it received on the proposed rule change, as amended. The text of these statements may be examined at the places specified in Item III below. Nasdaq has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

### A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

#### 1. Purpose

Currently, OE Firms must designate all limit orders they enter into SuperMontage as "Immediate-or-Cancel" ("IOC"). This designation, while allowing such orders to potentially execute if marketable when they reach the front of the SuperMontage processing queue, also instructs the system to return the order to the OE Firms if the order's price precludes an immediate execution. In short, OE Firms can enter market orders and marketable limit orders, but cannot enter non-marketable limit orders. Nasdaq believes that the result is that all SuperMontage participants are deprived
