

receive comments, OSHA will determine whether additional procedures are necessary.

### Existing Conditions

Currently, OSHA imposes certain conditions on its recognition of ITSNA. As mentioned in previous notices, these conditions continue to apply solely to ITSNA's NRTL operations and are in addition to any other condition that OSHA normally imposes in its recognition of an organization as an NRTL. One condition refers to "ITS Ltd", which represents Intertek Testing Services, Ltd., the parent company of ITSNA. For background as to why we imposed the condition, see 63 FR 69676, December 17, 1998, and 66 FR 29178, May 29, 2001. We include these conditions in this notice mainly for information and list them first under the Conditions section below.

### Final Decision and Order

The NRTL Program staff has examined the application, the assessor's recommendation, and other pertinent information. Based upon this examination and the recommendation, OSHA finds that Intertek Testing Services NA, Inc., has met the requirements of 29 CFR 1910.7 for expansion of its recognition to include an additional 46 test standards subject to the limitation and conditions listed below, and one added standard subject to further review. Pursuant to the authority in 29 CFR 1910.7, OSHA hereby expands the recognition of ITSNA, subject to this limitation and these conditions.

### Limitation

OSHA limits the expansion to testing and certification of products for demonstration of conformance to the following 46 test standards, and OSHA has determined the standards are appropriate within the meaning of 29 CFR 1910.7(c).

 UL 61058-1 Switch for Appliances

**Note:** Testing and certification of gas operated equipment is limited to equipment for use with "liquefied petroleum gas" ("LPG" or "LP-Gas")

OSHA's recognition of ITSNA, or any NRTL, for a particular test standard is limited to equipment or materials (*i.e.*, products) for which OSHA standards require third party testing and certification before use in the workplace. Consequently, any NRTL's scope of recognition excludes any product(s) that fall within the scope of a test standard, but for which OSHA standards do not require NRTL testing and certification.

Many of the UL test standards listed above also are approved as American National Standards by the American National Standards Institute (ANSI). However, for convenience, we use the designation of the standards developing organization (*e.g.*, UL 536) for the standard, as opposed to the ANSI designation (*e.g.*, ANSI/UL 536). Under our procedures, any NRTL recognized for an ANSI-approved test standard may use either the latest proprietary version of the test standard or the latest ANSI version of that standard. (Contact ANSI or the ANSI web site (<http://www.ansi.org>) and click "NSSL" to find

<sup>1</sup> This standard is approved for testing and certification of vehicle battery adaptors for use within recreational vehicles and mobile homes.

<sup>2</sup> Limited to electrical portions only.
