

The Proposal

This action amends Title 14 Code of Federal Regulations, part 71 (14 CFR part 71) by revising Class E airspace around La Junta Municipal Airport at La Junta, CO. The establishment of RNAV (GPS) RWY 26 and RNAV (GPS) RWY 8 SIAPs at La Junta Municipal Airport has made this proposal necessary. Additional controlled airspace extending upward from 700 feet above the surface of the earth is needed to contain aircraft executing the RNAV (GPS) RWY 26 and the RNAV (GPS) RWY & SIAPs at La Junta Municipal Airport. The intended effect of this proposal is to provide adequate controlled airspace for aircraft executing the RNAV (GPS) RWY 26 and RNAV (GPS) RWY 8 SIAPs at La Junta Municipal Airport, La Junta, CO.

Class E airspace designations are published in paragraph 6005 of FAA Order 7400.9L dated September 16, 2003, and effective September 15, 2004, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be published subsequently in this Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this proposed regulation—(1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11013; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule would not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.
