SUPPLEMENTARY INFORMATION:

Title: Statement of Materials and Labor Used by Contractors on Highway Construction Involving Federal Funds.

OMB Control Number: 2125-0033.

Background: The State highway agencies and contractors who work on highway projects are required to submit data regarding the usage of materials and labor in highway construction (23 CFR 635.126). This data is submitted to the FHWA on Form FHWA-47, "Statement of Materials and Labor Used by Contractors on Highway Construction Involving Federal Funds." Title 29 U.S.C. 2 authorizes the Department of Labor (DOL) to collect the labor-related information using its own forces or by getting the information from other Federal agencies. An informal agreement has been reached for the FHWA to collect the desired data for DOL. The data is used by the FHWA for estimating current materials usage and cost distribution on Federal-aid highway construction contracts to aid in planning for future requirements based on anticipated program levels. The information is also used by the Department of Labor in its studies on the highway construction industry's labor and materials requirements, and by the industry, including the materials suppliers. This information is made available to other Federal, State and local agencies, universities, businesses, and industry for their own uses.

Estimated Annual Burden: The FHWA estimates that the total annual burden imposed on the public by this collection is 7,475 hours and the estimated time to complete each report is 5 hours.

Number of Respondents: 650 State highway agencies and Federal-Aid highway contractors.

Frequency: Approximately 650 State highway agencies and Federal-Aid highway contractors complete and submit an average of 2.3 reports on Form FHWA-47 each year.
