

information from U.S. exporters in order to determine the exporters' eligibility for the Export Enhancement Program (EEP) and the Dairy Export Incentive Program (DEIP). Information can be faxed in by program applicants or applicants may register over the Internet.

Need and Use of the Information: Information collected from U.S. Exporters is used by FAS to determine whether an exporter has the experience necessary to perform under the proposed agreements. Other information is collected to determine compliance during the period of the agreement and to ensure that compensation in the appropriate amount is made. Without the application and related information, FAS would be unable to properly qualify U.S. Exporters for EEP and DEIP.

Description of Respondents: Business or other for-profit.

Number of Respondents: 26.

Frequency of Responses: Recordkeeping; reporting: On occasion.

Total Burden Hours: 1,803.

Economic Research Service

Title: An Assessment of the Impact of Medicaid Managed Care on WIC Program Coordination with Primary Care Services.

OMB Control Number: 0536-NEW.

Summary of Collection: The Economic Research Service (ERS) has responsibility, as authorized in the Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriation Act, Fiscal Year 2002 (Pub. L. 1-7-76) to conduct economic research on the operation of the Nation's food assistance programs, especially the Food Stamp Program, Child Nutrition Programs, and the Special Supplemental Nutrition Program for Women, Infants, and Children (WIC). The relationship between the WIC program and primary care services is an important component of the program. ERS is seeking detailed information that will determine the impact Medicaid managed care may have on the ability of WIC to coordinate services with primary care providers. The study will be conducted through telephone surveys and e-mail.

Need and Use of the Information: ERS will collect information to understand the impact of Medicaid managed care on the coordination between WIC and primary care services in a way that will be relevant to public policymakers. Data from the study can be used by FNS to assess how well existing program policies and procedures facilitate coordination and referral between WIC and Medicaid managed care.

Description of Respondents: State, Local or Tribal Government; business or other for-profit.

Number of Respondents: 210.

Frequency of Responses: Reporting: On occasion.

Total Burden Hours: 132.

Forest Service

Title: National Survey on Recreation and the Environment 2005.

OMB Control Number: 0596-0127.

Summary of Collection: The National Survey on Recreation and the Environment (NSRE) 2005 will be the latest in a series of surveys conducted by the Forest Service (FS) which began in 1960 as the primary source of recreation data from the U.S.

population. This information is vital for federal land managing agencies to obtain an understanding of the outdoor recreation participation levels and preferences of the American people so that effective policy making, planning, and decision-making can occur.

Information from the survey is shared with and relied upon by organizations outside the federal government including educational institutions, private sector companies, state agencies, and other governmental organizations as the fundamental source of outdoor recreation trend and demand data on a national scale. The survey will be administered using a statistically valid sampling methodology through computer-assisted telephone interviewing techniques.

Need and Use of the Information: FS will collect information nationally from the public to assess trends in recreation participation over the years and to estimate demand for outdoor recreation among the U.S. population. FS and other federal agencies will use the information to develop long-range strategic plans, adjust programs and activities to meet customer needs and expectations and better manage federally owned lands.

Description of Respondents: Individuals or households.

Number of Respondents: 16,666.

Frequency of Responses: Reporting: Other (one time).

Total Burden Hours: 4,166.

National Agricultural Statistics Service

Title: List Sampling Frame Survey.

OMB Control Number: 0535-0140.

Summary of Collection: The primary objective of the National Agricultural Statistics Service (NASS) is to provide data users with timely and reliable agricultural production and economic statistic, as well as environmental and specialty agricultural related statistics. To accomplish this objective, NASS

relies heavily on the use of sample surveys statistically drawn from "List Sampling Frame." The List Sampling Frame is a database of names and addresses, with control data, that contains the components from which these samples can be drawn.

Need and Use of the Information: The List Sampling Frame is used to maintain a complete list of possible farm operations. The goal is to produce for each state a relatively complete, current, and unduplicated list of names to sample for agricultural operation surveys. Government agencies and educational institutions use the information from these surveys in planning, farm policy analysis, and program administration.

Description of Respondents: Farms; business or other for-profit.

Number of Respondents: 350,000.

Frequency of Responses: Reporting: On occasion.

Total Burden Hours: 22,500.

National Agriculture Statistics Service

Title: Childhood Injury and Adult Occupational Injury Survey of Minority Farm Operators.

OMB Control Number: 0535-0235.

Summary of Collection: The primary function of the National Agricultural Statistics Services (NASS) is to prepare and issue state and national estimates of crop and livestock production under the authority of 7 U.S.C. 2204(a). NASS will conduct a survey that will provide estimates of annual childhood and adult nonfatal injury incidence rates on minority farms, annual injury frequencies, and descriptive injury information for minority farm operators and their employees 20 years of age or older.

Need and Use of the Information: The National Institute of Occupational Safety Health will use the data to develop injury prevention materials for minority farm operators and technical reports. The objective of this project is to develop a uniform inquiry for determining the incidence rate and characteristics of childhood agricultural and adult occupational injuries occurring on minority operated farms in the United States.

Description of Respondents: Farms.

Number of Respondents: 50,000.

Frequency of Responses: Reporting: Other (One-Time).

Total Burden Hours: 12,093.

Rural Utilities Service

Title: Preloan Procedures and Requirements for Telecommunications Program.

OMB Control Number: 0572-0079.

Summary of Collection: The Rural Utilities Service (RUS) is a credit agency
