

Petitioner states that the vehicles also comply with the Bumper Standard found at 49 CFR part 581.

Petitioner also contends that the vehicles are capable of being readily altered to meet the following standards, in the manner indicated:

Standard No. 101 *Controls and Displays*: (a) Inscription of the word "BRAKE" on the instrument cluster in place of the international ECE warning symbol; (b) replacement or modification of the speedometer to read in miles per hour.

Standard No. 108 *Lamps, Reflective Devices and Associated Equipment*: Installation of U.S.-model taillamp assemblies.

Standard No. 111 *Rearview Mirror*: Replacement of the passenger side rearview mirror with a U.S.-model component, or inscription of the required warning statement on the face of that mirror.

Standard No. 114 *Theft Protection*: Installation of a key warning buzzer, or reprogramming of the vehicle to activate the key warning system.

Standard No. 118 *Power-Operated Window Systems*: Inspection of all vehicles and installation of a relay to make the window transport inoperative when the ignition is switched off in vehicles that are not already so equipped.

Standard No. 120 *Tire Selection and Rims*: Installation of a tire information placard.

Standard No. 201 *Occupant Protection in Interior Impact*: Inspection of all vehicles and installation of U.S.-model components necessary to achieve compliance with the standard in vehicles that are not already so equipped.

Standard No. 208 *Occupant Crash Protection*: (a) Installation of a seat belt warning buzzer, wired to the seat belt micro switch; (b) Inspection of all vehicles and replacement of the driver's and passenger's air bags, knee bolsters, control unit, sensor, and all seat belts that are not U.S.-model components. The petitioner states that the vehicles should be equipped with dual front air bags and knee bolsters, with combination lap and shoulder belts at the front and rear outboard seating positions that are self-tensioning and released by means of a single red pushbutton, and with a lap belt in the rear center seating position.

Standard No. 214 *Side Impact Protection*: Inspection of all vehicles and installation of U.S.-model door beams on vehicles that are not already so equipped.

Standard No. 225 *Child Restraint Anchorage Systems*: Installation of a U.S.-model child seat tether anchor kit.

The petitioner states that all vehicles must be inspected to ensure that they are equipped with U.S.-model bumpers and that these components will be installed in vehicles not already so equipped to achieve compliance with the Bumper Standard found in 49 CFR part 581.

The petitioner also states that a vehicle identification plate must be affixed to the vehicles near the left windshield post and a reference and certification label must be affixed in the area of the left front door post to meet the requirements of 49 CFR part 565. The petition further states that a certification label must be affixed to the driver's door latch post to comply with the requirements of 49 CFR part 567.
