

marketed. The countries may be listed specifically or may be identified by Country Groups, geographic areas, etc.

(2) *License applications for the reexport of incorporated parts and components.* If you are submitting a license application for the reexport of parts, components, or materials incorporated abroad into products that will be sent to designated third countries you must include the following information in your license application:

(i) In the "Special Purpose" field or block, enter the phrase "Parts and Components";

(ii) In the "Ultimate Consignee" field or block, enter the name, street address, city and country of the foreign party who will be receiving the foreign-made product. If you are requesting approval for multiple countries or consignees enter "Various" in the "Ultimate Consignee" field or block and list the specific countries, Country Groups, or geographic areas in the "Additional Information" field or block;

(iii) In the "Original Ultimate Consignee" field or block, enter the name, street address, city, and country of the foreign party who will be exporting the foreign-made product incorporating U.S. origin parts, components or materials;

(iv) In the "Specific End-Use" field or block, describe the activity of the end-user identified in the "End-User" field or block or, if the ultimate consignee is also the end user, of the ultimate consignee identified in the "Ultimate Consignee" field or block, and the end-use of the foreign-made product. Indicate the final configuration if the product is intended to be incorporated in a larger system. If the end-use is unknown, state "unknown" and describe the general activities of the end-user;

(v) In the "Quantity" field or block, specify the quantity for each foreign-made product. If this information is unknown, enter "Unknown" in the Quantity field or block;

(vi) In the "Total Price" field or block, enter the digit "0" for each foreign-made product;

(vii) In the "Technical Description" field or block, describe the foreign-made product that will be exported, specifying type and model or part number. Attach brochures or specifications, if available. Show as part of the description the unit value, in U.S. dollars, of the foreign-made product (if more than one foreign-made product is listed on the license application, specify the unit value for each type/model/part number). Also include a description of the U.S. content (including the applicable Export Control Classification Number(s)) and its value in U.S. dollars. If more than one foreign-made product is identified on the license application, describe the U.S. content and specify the U.S. content value for each foreign-made product. Also, provide sufficient support information to explain the basis for the stated values. To the extent possible, explain how much of the value of the foreign-made product represents foreign origin parts, components, or materials, as opposed to labor, overhead, etc. When the U.S. content varies and cannot be specified in advance, provide a range of percentage and value that would indicate the minimum and maximum U.S. content;

(viii) Include separately in the "Technical Description" field or block a description of any U.S. origin spare parts to be reexported with the foreign-made product, if they exceed the amount allowed by § 740.10 of the EAR. Enter the quantity, if appropriate, in the "Quantity" field or block. Enter the ECCN for the spare parts in the "ECCN" field or block and enter the value of the spare parts in the "Total Price" field or block;

(ix) In the "Total Application Dollar Value" field or block, enter the digit "0";

(x) If the foreign-made product is the direct product of U.S. origin technology that was exported or reexported subject to written assurance, a request for waiver of that assurance, if necessary, may be made in the "Additional Information" field or block. If U.S. origin technology will accompany a shipment to a country listed in Country Group D:1 or E:2 (see Supplement No. 1 to part 740 of the EAR) describe in Additional Information field or block the type of technology and how it will be used.

(j) *Ship stores, plane stores, supplies, and equipment.*
