

determination under 40 CFR 51.160(a). These provisions also meet the requirements of 40 CFR 51.211 which require the owner or operator to maintain records and to periodically report to the State the nature and amounts of emissions and information necessary to determine whether a source is in compliance.

- All Standard Permits are adopted or revised through the process described in Sections 116.601–116.605. Such new or revised Standard Permits must undergo public notice and a 30-day comment period, and TCEQ must address all comments received from the public before finalizing its action to issue or revise a Standard Permit. This meets the requirements of 40 CFR 51.161 which requires the permitting authority to provide for opportunity for public comment on the information submitted and the State's analysis of the effect on construction or modification on ambient air quality.

The TSD contains further information on how Subchapter F of Chapter 116 meets the requirements of subpart I.

4. What Sections in Subchapter F Are We Not Approving in This Action?

We are not approving the following Sections in Subchapter F: section 116.617—Standard Permits for Pollution Control Projects, section 116.620—Installation and/or Modification of Oil and Gas Facilities, and section 116.621—Municipal Solid Waste Landfills. Approval of these sections is not necessary for our approval of Texas' PBR and Standard Permits regulations submitted to EPA on December 9, 2002. Sections 116.617, 116.620, and 116.621 will be addressed in a separate action.

As stated previously, we are approving changes which Texas submitted December 9, 2002, some of which address the deficiencies that we identified in our January 7, 2002, NOD. In that submittal, Texas submitted revisions to section 116.611—Registration to Use a Standard Permit. Section 116.611 is part of Subchapter F—Standard Permits. To date, we have not approved the provisions relating to Standard Permits, including the earlier submittals of section 116.611. Section 116.611 is part of, and dependent upon, other provisions of Subchapter F, and consequently section 116.611 cannot stand alone. Therefore, we must approve other provisions of Subchapter F, including the earlier submittals of section 116.611, which contain the process by which Texas issues and modifies Standard Permits when we approve the revisions to section 116.611 which Texas submitted December 9, 2002.

In order to approve section 116.611, we are addressing the provisions of Subchapter F which include the process for issuing and modifying Standard Permits. We are approving the provisions for issuing and modifying Standard Permits which are found in Sections 116.601–116.606, 116.610–116.611, and 116.614–116.615.

Sections 116.617, 116.620, and 116.621 are specific permits that Texas has issued. These Sections do not include any provisions relating to the process by which they (or any Standard Permit) must be issued or modified. The Sections which address the process for issuing and modifying Standard Permits (as identified above) are not dependent on the provisions of Sections 116.617, 116.620, and 116.621, and can be implemented without the approval of Sections 116.617, 116.620, and 116.621. Thus, today's final action does not include action on Sections 116.617, 116.620, and 116.621. We are also taking no action today on section 116.601(a)(1) which contains cross-references to Sections 116.617, 116.620, and 116.621. We will review and take appropriate action on Sections 116.617, 116.620, and 116.621, as well as section 116.601(a)(1), separately.

In addition, we are taking no action on section 116.610(d). Subsection (d) of section 116.610 addresses projects subject to Subchapter C of Chapter 116 (relating to Hazardous Air Pollutants: Regulations Governing Constructed or Reconstructed Major Sources (FCAA, § 112(g)). We have not completed our review of the provisions of Subchapter C. We will address Subchapter C and other provisions referring to Subchapter C (including section 116.610(d)) in a separate action.

V. Final Action Concerning Chapter 122—Federal Operating Permits

A. What Are We Approving?

We are approving section 122.122—Potential to Emit, as submitted December 9, 2002.

B. Is Section 122.122 Approvable?

Section 122.122 contains provisions by which a source may register and certify limitations on its production and operation which would limit its PTE below the level of a "major source" as defined under 40 CFR 70.2. Texas revised the rule to address a deficiency identified in the NOD. The changes that were made and our evaluation of why the changes are approvable are discussed in section II of this preamble.

VI. Summary of Today's Final Action

We are approving revisions of the Texas SIP to address Texas' SIP

submittal dated December 9, 2002. This includes Sections 106.6, revisions to section 116.115, and Sections 116.611 and 122.122. These SIP revisions relate to Texas' programs for PBR, Standard Permits, and Operating Permits.

The regulations allow a source to limit its PTE of a pollutant below the level of a major source defined in the Act. This includes regulations which Texas revised to allow an owner or operator of a source to register and certify restrictions and limitations that the owner or operator will meet to maintain its PTE below the major source threshold. The changes require the owner or operator to submit the certified registrations to the Executive Director of TCEQ, the appropriate TCEQ regional office, and to all local air pollution control agencies having jurisdiction over the site. The changes to section 122.122 satisfactorily address the NOD by making the PTE limits in the certified registrations practically and Federally enforceable.

We are also approving other provisions of Chapters 106 and 116 which incorporate Texas' regulations for PBR and Standard Permits that Texas submitted to EPA on April 29, 1994; August 17, 1994; September 20, 1995; April 19, 1996; May 21, 1997; July 22, 1998; October 25, 1999; January 3, 2000; September 11, 2000; July 25, 2001; and December 9, 2002.

VII. Statutory and Executive Order Reviews

Under Executive Order 12866 (58 FR 51735, October 4, 1993), this action is not a "significant regulatory action" and therefore is not subject to review by the Office of Management and Budget. For this reason, this action is also not subject to Executive Order 13211, "Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use" (66 FR 28355, May 22, 2001). This action merely approves state law as meeting Federal requirements and imposes no additional requirements beyond those imposed by state law. Accordingly, the Administrator certifies that this rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). Because this rule approves pre-existing requirements under state law and does not impose any additional enforceable duty beyond that required by state law, it does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4).
