III. Current Action

§ 57.8525 requires that the main ventilation fans for an underground mine be maintained either according to manufacturers' recommendations or a written periodic schedule adopted by the mine operators. A regular fan maintenance schedule is necessary to assure this uninterrupted and vital supply of air. The maintenance is normally scheduled as recommended by the fan manufacturers. Regardless of regularity, based on the loads of individual fans, the records assure compliance with the standard and may serve as a warning device for possible ventilation problems before they occur.
