

formerly 21 CFR 1240.50 and now 42 CFR 70.5 (Certain communicable diseases; special requirements)—contains a requirement for reporting certain information to the Federal government. Specifically, this regulation requires any person who is in the communicable period of cholera, plague, smallpox, typhus or yellow fever, or who, having been exposed to any such disease, is in the incubation period thereof, to apply for and receive a permit from the Surgeon General or his authorized representative in order to

travel from one State or possession to another.

Control of disease transmission within the States is considered to be the province of state and local health authorities, with federal assistance being sought by those authorities on a cooperative basis without application of federal regulations. The regulations formerly administered by FDA and assumed by CDC were developed to facilitate Federal action in the event of large outbreaks requiring a coordinated effort involving several states, or in the

event of inadequate local control. While it is not known whether, or to what extent situations may arise in which these regulations would be invoked, contingency planning for domestic emergency preparedness is now commonplace. Should this occur, CDC will use the reporting and record-keeping requirements contained in the regulations to carry out quarantine responsibilities as required by law. The estimated annualized burden is 3,600 hours.

Regulation/purpose	Respondent	No. of applicants	No. of responses per applicant	Average burden per response
42 CFR 70.3 Application to the State of destination for a permit to move from one State to another with a communicable disease.	Any person with a communicable disease who is seeking to travel from one State to another.	2,000	1	15/60
42 CFR 70.3 Copy of material submitted by applicant and permit issued by State health authority under this provision.	Attending physician .....	2,000	1	15/60
	State health authority .....	8	250	6/60
42 CFR 70.4 Report by the master of a vessel person in charge of a conveyance of the incidence of a communicable disease occurring while in interstate transit.	The master of a vessel or person in charge of a conveyance engaged in interstate traffic when a case or potential case of a communicable disease is identified.	1,500	1	15/60
42 CFR 70.4 Copy of material submitted to State or local health authority under this provision.	State or local health authority .....	20	75	6/60
42 CFR 70.5 Application for a permit to move from State to State while in the communicable period of or having been exposed to smallpox.	Any person with or in the incubation period of certain communicable diseases who is seeking to travel from one State to another.	3,750	1	15/60
	Attending physician .....	3,750	1	15/60

Dated: November 17, 2003.

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Centers for Disease Control and Prevention

[30Day-02-04]

#### Proposed Data Collections Submitted for Public Comment and Recommendations

The Centers for Disease Control and Prevention (CDC) publishes a list of information collection requests under review by the Office of Management and Budget (OMB) in compliance with the Paperwork Reduction Act (44 U.S.C. chapter 35). To request a copy of these requests, call the CDC Reports Clearance Officer at (404) 498-1210. Send written

comments to CDC, Desk Officer, Human Resources and Housing Branch, New Executive Office Building, Room 10235, Washington, DC 20503, or by fax to (202) 395-6974. Written comments should be received within 30 days of this notice.

*Proposed Project:* Evaluation of Customer Satisfaction with the Agency for Toxic Substances and Disease Registry Internet Home Page and Links (OMB No. 0923-0028)—Reinstatement—Agency for Toxic Substances and Disease Registry (ATSDR).

ATSDR proposes to conduct customer satisfaction research for its Internet site. Information on the site focuses on prevention of exposure and adverse human health effects and diminished quality of life associated with exposure to hazardous substances from waste sites, unplanned releases, and other sources of pollution present in the environment. The site is designed to serve the general public, persons at risk for exposure to hazardous substances, and health professionals.

Approval for a similar Customer Satisfaction Survey was requested in 2002 jointly with the Centers for Disease Control and Prevention (OMB No. 0920-0449, Expiration Date 09/30/2003). The new survey is solely for ATSDR and is significantly shorter and would require less time to complete.

This research will ensure that targeted audiences find the information easy to access, clear, informative, and useful. Specifically, the research will examine whether the information is presented in an appropriate technological format and meets the needs, wants, and preferences of visitors or "customers" using the Web site. Results from the previous survey were utilized to redesign the ATSDR Web site—making improvements to architecture, links, organization, and content. Results from the new survey will assist ATSDR in making more improvements to the Web site in order to better serve its customers and visitors. The estimated annualized burden is 83 hours.
