SUPPLEMENTARY INFORMATION:

I. Background

MDUFMA amended the Federal Food, Drug, and Cosmetic Act by authorizing FDA to collect user fees for certain premarket submissions (premarket approval applications, premarket reports, supplements, premarket notifications, biologics license applications, and efficacy supplements) received on or after October 1, 2002. A letter from the Secretary of Health and Human Services to Congress that accompanies the user fee legislation sets

forth performance goals and policy and procedural provisions. One of these provisions is entitled "Bundling Policy" and states that FDA will consider, in consultation with its stakeholders, when bundling multiple devices in a single submission may be appropriate. (<http://www.fda.gov/cdrh/mdufma/pgoals.html>).

This guidance describes FDA's policy on bundling multiple devices or multiple indications in a single premarket submission and is intended to help FDA staff and industry determine when bundling is appropriate. In developing this guidance, the agency has considered comments on the topic that were submitted to the public docket on MDUFMA Implementation (Docket No. 02N-0534). FDA has also included in the guidance many of the examples provided by stakeholders.

II. Significance of Guidance

This guidance document supersedes Section V, "Bundling Multiple Devices in a Single Application" of the February 2003 guidance entitled, "Assessing User Fees: PMA Supplement Definitions, Modular PMA Fees, BLA and Efficacy Supplement Definitions, Bundling Multiple Devices in a Single Application, and Fees for Combination Products; Guidance for Industry and FDA." FDA announced the availability of that guidance in the **Federal Register** of February 25, 2003 (68 FR 8773). As discussed above, FDA reviewed the comments received on the issue of bundling. FDA also invites comments on this guidance document (see section V of this document).

This guidance document is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). The guidance represents the agency's current thinking on bundling multiple devices or multiple indications in a single premarket submission. It does not create or confer any rights for or on any person and does not operate to bind FDA or the public. You can use an alternative approach if the approach satisfies the requirements of the applicable statutes and regulations. If you want to discuss an alternative approach, contact the FDA staff responsible for implementing this guidance. If you cannot identify the appropriate FDA staff, call one of the numbers listed above or on the title page of the guidance document.
