[I.D.110503G]

Final Environmental Impact Statement for an Incidental Take Permit Application and Habitat Conservation Plan (Plan), by J.L. Storedahl & Sons, Inc.(Storedahl), Clark County, WA

AGENCY: National Marine Fisheries Service, National Oceanic and Atmospheric Administration (NOAA), Commerce; U.S. Fish and Wildlife Service (USFWS), Interior.

ACTION: Notice of availability of final environmental impact statement.

SUMMARY: This document announces the availability of the Final Environmental Impact Statement (Statement) for public review. The Statement addresses the proposed issuance of Incidental Take Permits (Permits) to J.L. Storedahl & Sons, Inc., Clark County, WA. The proposed Permits relate to gravel mining, gravel processing, and mining reclamation activities on approximately 300 acres of Storedahl-owned lands adjacent to the East Fork Lewis River, Clark County, WA. The proposed Permits would authorize the take of the following threatened species incidental to otherwise lawful activities: steelhead (*Oncorhynchus mykiss*), bull trout (*Salvelinus confluentus*), chum salmon (*Oncorhynchus keta*), and Chinook salmon (*Oncorhynchus tshawytscha*). Storedahl is also seeking coverage for five currently unlisted species (including anadromous and resident fish) under specific provisions of the Permits, should these species be listed in the future. The duration of the proposed Permits is 25 years. This notice is provided pursuant to the Endangered Species Act (ESA) and National Environmental Policy Act (NEPA).

DATES: Written comments on the Statement must be received from all interested parties on or before December 29, 2003. A Record of Decision will occur no sooner than 30 days after the

publication date of the Environmental Protection Agency's published notice in the **Federal Register**.

ADDRESSES: See **SUPPLEMENTARY INFORMATION** section for addresses of locations at which hard-copies of the Plan and associated documents may be obtained or reviewed. To request documents on CD-ROM, call the USFWS at (360) 534-9330.

Comments and requests for information should be sent to Tim Romanski, Storedahl FEIS/HCP Comments, U.S. Fish and Wildlife Service, 510 Desmond Drive, S.E., Suite 102, Lacey, Washington 98503-1263, telephone (360) 753-5823, facsimile (360) 753-9518. Comments and materials received will be available for public inspection, by appointment, during normal business hours at the above address.

FOR FURTHER INFORMATION CONTACT: Tim Romanski, Project Manager, U.S. Fish and Wildlife Service, (360) 753-5823; or Laura Hamilton, Project Manager, National Marine Fisheries Service, (360) 753-5820.

SUPPLEMENTARY INFORMATION: Hard bound copies are available for viewing, or duplication, at the following libraries: Woodland Community Library, 770 Park St, Woodland, WA (360) 225-2115; Battle Ground Community Library, 12 W Main St, Battle Ground, WA (360) 687-2322; Ridgefield Community Library, 210 N Main Ave, Ridgefield, WA (360) 887-8281; Vancouver Community Library, 1007 E Mill Plain Blvd, Vancouver, WA (360) 695-1566; and, Olympia Timberland Library, Reference Desk, 313 8th Avenue SE, Olympia, WA (360) 352-0595.

Background

J.L. Storedahl & Sons, Inc., owns and operates a gravel processing plant in rural Clark County, WA, adjacent the East Fork Lewis River. This site is known as the Daybreak Mine. It is located approximately 4 miles (6.4 km) southeast of the town of LaCenter, and approximately 1 mile (1.6 km) downstream of Clark County's Daybreak Park. The 300-acre (121.4 ha) site is composed of two parcels. One parcel is approximately 82 acres (33.2 ha) and consists of five pits, which were mined intermittently, under different owners, from 1968 to 1995. No active extraction of gravel from this site is now occurring. Current operations are limited to processing and distributing sand and gravel that is mined off-site. Processing involves separating the sand from the gravel, and separating the gravel into different size classes. The second parcel is located immediately to the north and

east of this previously mined area, on a low terrace above the 100-year floodplain. This 178-acre (72.0 ha) parcel contains high quality sand and gravel deposits that have not been mined. Current operations on this parcel include cattle grazing and hay and crop production.

Storedahl proposes to mine the sand and gravel deposits from 101 acres (40.9 ha) of this 178-acre parcel, and continue processing operations at the other parcel. These operations would continue until sand and gravel extraction at the 178-acre parcel is complete, projected to be 15 years or less. Concurrent with, and following sand and gravel extraction, Storedahl would implement a site reclamation plan.

The proposed mining, processing, and reclamation activities have the potential to affect fish and wildlife associated with the East Fork Lewis River ecosystem. The majority of the gravel to be mined is located just below the water table in a shallow aquifer, and the proposed gravel mining and reclamation plan would create a series of open water ponds and emergent wetlands. The created ponds and wetlands would drain via a controlled outlet to a small creek (Dean Creek) and then to the East Fork Lewis River. The shallow aquifer is connected to the East Fork Lewis River. The proposed mining and reclamation plan has the potential to affect a suite of habitat conditions, including, but not limited to, water quality, channel morphology, riparian function, off-channel connections, and the conversion of pastureland to forest, wetland, and open water habitats. Some of these effects could involve species subject to protection under the ESA.

Section 10 of the ESA contains provisions for the issuance of Incidental Take Permits to non-Federal land owners for the take of endangered and threatened species. Any such take must be incidental to otherwise lawful activities, and must not appreciably reduce the likelihood of the survival and recovery of the species in the wild. As required under the Permit application process, Storedahl has developed, with assistance from the Services, a Habitat Conservation Plan (Plan) containing a strategy for minimizing and mitigating take associated with the proposed activities to the maximum extent practicable for their proposed activities adjacent to the East Fork Lewis River.

Activities proposed for coverage under the Permits include the following:

(1) Gravel mining and related activities in the terrace above the 100-year floodplain, with potential impacts
