

Part 2

For the most recent 12-month period for which complete data are available, provide the number of vessel calls each party made at each port for its liner services that would be covered by the agreement within the entire geographic scope of the agreement.

Part 3

Provide a narrative statement that clearly describes the nature, basis, and effects of any anticipated or planned changes in the vessel capacity and/or liner services (including service at ports) that the parties would implement under the agreement after it goes into effect. If no change is anticipated or planned, it shall be noted with the term "none" in response to part 3 of this section.

Section IV

Section IV applies to agreements identified in 46 CFR 535.502 that contain any of the following authorities: (a) The discussion of, or agreement upon, whether on a binding basis under a common tariff or a non-binding basis, any kind of rate or charge; (b) the establishment of a joint service; (c) The pooling or division of cargoes, earnings, or revenues and/or losses; (d) the discussion or exchange of data on vessel-operating costs; and/or (e) the discussion of service contract matters. Parties to such agreements must complete parts 1 through 5 of this section.

Part 1

For the most recent calendar quarter for which complete data are available, provide the market shares of all liner operators for the entire geographic scope of the agreement and in each sub-trade within the scope of the agreement. A joint service shall be treated as a single liner operator, whether it is an agreement line or a non-agreement line. Sub-trade is defined as the scope of all liner movements between each U.S. port range within the scope of the agreement and each foreign country within the scope of the agreement. Where the agreement covers both U.S. inbound and outbound liner movements, inbound and outbound market shares shall be shown separately.

U.S. port ranges are defined as follows:

Atlantic and Gulf—Includes ports along the eastern seaboard and the Gulf of Mexico from the northern boundary of Maine to Brownsville, Texas. Also includes all ports bordering upon the Great Lakes and their connecting waterways, all ports in the State of New York on the St. Lawrence River, and all ports in Puerto Rico and the U.S. Virgin Islands.

Pacific—Includes all ports in the States of Alaska, Hawaii, California, Oregon, and Washington. Also includes all ports in Guam, American Samoa, Northern Marianas, Johnston Island, Midway Island, and Wake Island.

An application may be filed for a waiver of the definition of "sub-trade" under the procedure described in 46 CFR 535.504. In any such application, the burden shall be on the parties to show that their marketing and pricing practices have been done by ascertainable multi-country regions rather than by individual countries or, in the case of the United States, by broader areas than

the port ranges defined herein. The parties must further show that, though operating individually, they were nevertheless applying essentially similar regional practices.

The formula for calculating market share in the entire agreement scope or in a sub-trade is as follows: The total amount of liner cargo carried on each liner operator's liner vessels in the entire agreement scope or in the sub-trade during the most recent calendar quarter for which complete data are available, divided by the total liner movements in the entire agreement scope or in the sub-trade during the same calendar quarter, which quotient is multiplied by 100. The calendar quarter used must be clearly identified. The market shares held by non-agreement lines as well as by agreement lines must be provided, stated separately in the format indicated.

If 50 percent or more of the total liner cargo carried by the parties in the entire agreement scope or in the sub-trade during the calendar quarter was containerized, only containerized liner movements (measured in TEUs) must be used for determining market share. If 50 percent or more of the total liner cargo carried by the parties was non-containerized, only non-containerized liner movements must be used for determining market share. The unit of measurement used in calculating amounts of non-containerized cargo must be specified clearly and applied consistently.

Part 2

For each party that served all or any part of the geographic scope of the agreement during all or any part of the most recent 12-month period for which complete data are available, provide each party's total liner revenues within the geographic scope, total liner cargo carried within the geographic scope, and average revenue. For purposes of this Form, total liner revenues means the total revenues, in U.S. dollars, of each party corresponding to its total cargo carried for its liner services that would fall under the agreement, inclusive of all ocean freight charges, whether assessed on a port-to-port basis or a through intermodal basis; accessorial charges; surcharges; and charges for inland cargo carriage. Average revenue shall be calculated as the quotient of each party's total liner revenues within the geographic scope divided by its total cargo carried within the geographic scope.

When 50 percent or more of the total liner cargo carried by all the parties in the geographic scope of the agreement during the 12-month period was containerized, each party shall report only its total carryings of containerized liner cargo (measured in TEUs) within the geographic scope, total revenues generated by its carriage of containerized liner cargo, and average revenue per TEU. When 50 percent or more of the total liner cargo carried by all the parties in the geographic scope of the agreement during the 12-month period was non-containerized, each party shall report only its total carryings of non-containerized liner cargo (specifying the unit of measurement used), total revenues generated by its carriage of non-containerized liner cargo, and average revenue per unit of measurement. When the agreement covers

both U.S. inbound and outbound liner movements, inbound and outbound data shall be stated separately.

Part 3(A)

For the same 12-month period used in part 2 of this section, provide a list, for the entire geographic scope of the agreement, of the top 10 liner commodities (including commodities not subject to tariff publication) carried by all the parties for their liner services that would fall under the agreement. For purposes of this Form, commodities shall be identified at the 4-digit level of customarily used commodity coding schedules. When 50 percent or more of the total liner cargo carried by all the parties in the geographic scope of the agreement during the 12-month period was containerized, this list shall include only containerized commodities. When 50 percent or more of the total liner cargo carried by all the parties in the geographic scope of the agreement during the 12-month period was non-containerized, this list shall include only non-containerized commodities. When the agreement covers both U.S. inbound and outbound liner movements, inbound and outbound data shall be stated separately.

Part 3(B)

Provide the cargo volume and revenue results for each party for each of the major commodities listed in part 3(A) of this section, corresponding to the same 12-month period and unit of measurement used. For purposes of this Form, revenue results means the revenues, in U.S. dollars, earned by each party on the cargo volume of each major commodity listed in part 3(A) of this section, inclusive of all ocean freight, whether assessed on a port-to-port basis or a through intermodal basis; accessorial charges; surcharges; and charges for inland cargo carriage. If a party has no cargo volume and revenue results for a commodity listed in part 3(A) of this section, it shall be noted by using a zero for that party in response to part 3(B) of this section.

Part 4(A)

For the same calendar quarter used in part 1 of this section, provide the amount of vessel capacity for each party for each of its liner services that would fall under the agreement within the entire geographic scope of the agreement, stated separately for the U.S. inbound and outbound trades as applicable to the geographic scope of the agreement. For purposes of this Form, vessel capacity means a party's total commercial liner space on line-haul vessels, whether operated by it or other parties from whom space is obtained, sailing to and/or from the continent of North America for each of its liner services that would fall under the agreement. When 50 percent or more of the total liner cargo carried by all the parties in the geographic scope of the agreement during the calendar quarter was containerized, the amount(s) of vessel capacity for each party shall be reported in TEUs. When 50 percent or more of the total liner cargo carried by all the parties in the geographic scope of the agreement during the calendar quarter was non-containerized, the amount(s) of vessel capacity for each party shall be reported in
