

liner vessel means a vessel used in a liner service; liner service means a definite, advertised schedule of sailings at regular intervals; and TEU means a unit of measurement equivalent to one 20-foot shipping container. Further, when used in this Report, the terms "entire geographic scope of the agreement" or "agreement-wide" refer to the combined U.S. inbound trade and/or the combined U.S. outbound trade as such trades apply to the geographic scope of the agreement, rather than "sub-trades" which refer to the trade between specific foreign countries and specific U.S. port ranges that are included in the geographic scope of the agreement. Whether required on a combined trade basis or a sub-trade basis, the U.S. inbound trade (or sub-trades) and the U.S. outbound trade (or sub-trades) shall always be stated separately.

Section I

Section I applies to agreements, identified in 46 CFR 535.702(a)(1), that contain the authority to discuss or agree on capacity rationalization as defined in 46 CFR 535.104(e). Parties to such agreements must complete parts 1 through 3 of this section.

Part 1

State the full name of the agreement and the agreement number assigned by the FMC.

Part 2(A)

For the preceding calendar quarter, provide the amount of vessel capacity for each party for each of its liner services that is covered by the agreement within the entire geographic scope of the agreement, stated separately for the U.S. inbound and outbound trades as applicable to the geographic scope of the agreement. For purposes of this Report, vessel capacity means a party's total commercial liner space on line-haul vessels, whether operated by it or other parties from whom space is obtained, sailing to and/or from the continent of North America for each of its liner services that is covered by the agreement.

When 50 percent or more of the total liner cargo carried by all the parties in the geographic scope of the agreement during the calendar quarter was containerized, the amount(s) of vessel capacity for each party shall be reported in TEUs. When 50 percent or more of the total liner cargo carried by all the parties in the geographic scope of the agreement during the calendar quarter was non-containerized, the amount(s) of vessel capacity for each party shall be reported in non-containerized units of measurement. The unit of measurement used in calculating the amounts of non-containerized vessel capacity must be specified clearly and consistently applied.

Part 2(B)

For the preceding calendar quarter, provide the percentage of vessel capacity utilization for each party for each of its liner services that is covered by the agreement within the entire geographic scope of the agreement, corresponding to the figures used in part 2(A) of this section, stated separately for the U.S. inbound and outbound trades as applicable to the geographic scope of the agreement. For purposes of this Report, the percentage of

vessel capacity utilization means a party's total volume of liner cargo, for each of its liner services that is covered by the agreement, carried on any vessel space counted under part 2(A) of this section, divided by its total vessel capacity as defined and derived in part 2(A) of this section, which quotient is multiplied by 100.

Part 3

Provide a narrative statement that clearly describes the nature, basis, and effects of any planned changes in the vessel capacity and/or liner services (including service at ports) that the parties will implement under the agreement. This narrative statement shall be submitted to the Director, Bureau of Trade Analysis, no later than 15 days after a vessel capacity and/or liner service change has been agreed upon by the parties but prior to the implementation of the actual change under the agreement.

Section II

Section II applies to agreements, identified in 46 CFR 535.702(a)(2), where the parties to the agreement hold a combined market share, based on cargo volume, of 35 percent or more in the entire U.S. inbound or outbound geographic scope of the agreement and the agreement contains any of the following authorities: (a) The discussion of, or agreement upon, whether on a binding basis under a common tariff or a non-binding basis, any kind of rate or charge; (b) the establishment of a joint service; (c) the pooling or division of cargoes, earnings, or revenues and/or losses; (d) the discussion or exchange of data on vessel-operating costs; and/or (e) the discussion of service contract matters. Parties to such agreements must complete parts 1 through 6 of this section.

Part 1

State the full name of the agreement and the agreement number assigned by the FMC.

Part 2

For the preceding calendar quarter, provide the market shares of all liner operators for the entire geographic scope of the agreement and in each sub-trade within the scope of the agreement. A joint service shall be treated as a single liner operator, whether it is an agreement line or a non-agreement line. Sub-trade is defined as the scope of all liner movements between each U.S. port range within the scope of the agreement and each foreign country within the scope of the agreement. Where the agreement covers both U.S. inbound and outbound liner movements, inbound and outbound market shares shall be shown separately.

U.S. port ranges are defined as follows:

Atlantic and Gulf—Includes ports along the eastern seaboard and the Gulf of Mexico from the northern boundary of Maine to Brownsville, Texas. Also includes all ports bordering upon the Great Lakes and their connecting waterways, all ports in the State of New York on the St. Lawrence River, and all ports in Puerto Rico and the U.S. Virgin Islands.

Pacific—Includes all ports in the States of Alaska, Hawaii, California, Oregon, and Washington. Also includes all ports in Guam, American Samoa, Northern Marianas,

Johnston Island, Midway Island, and Wake Island.

An application may be filed for a waiver of the definition of "sub-trade" under the procedure described in 46 CFR 535.705. In any such application, the burden shall be on the parties to show that their marketing and pricing practices have been done by ascertainable multi-country regions rather than by individual countries or, in the case of the United States, by broader areas than the port ranges defined herein. The Commission will also consider whether the alternative definition of "sub-trade" requested by the waiver application is reasonably consistent with the definition of "sub-trade" applied in the original Information Form for the agreement.

The formula for calculating market share in the entire agreement scope or in a sub-trade is as follows: The total amount of liner cargo carried on each liner operator's liner vessels in the entire agreement scope or in the sub-trade during the most recent calendar quarter for which complete data are available, divided by the total liner movements in the entire agreement scope or in the sub-trade during the same calendar quarter, which quotient is multiplied by 100. The market shares held by non-agreement lines as well as by agreement lines must be provided, stated separately in the format indicated.

If 50 percent or more of the total liner cargo carried by the parties in the entire agreement scope or in the sub-trade during the calendar quarter was containerized, only containerized liner movements (measured in TEUs) must be used for determining market share. If 50 percent or more of the total liner cargo carried by the parties was non-containerized, only non-containerized liner movements must be used for determining market share. The unit of measurement used in calculating amounts of non-containerized cargo must be specified clearly and applied consistently.

Part 3

For the preceding calendar quarter, provide each party's total liner revenues in the entire geographic scope of the agreement, total liner cargo carried in the entire geographic scope of the agreement, and average revenue. For purposes of this Report, total liner revenues means the total revenues, in U.S. dollars, of each party corresponding to its total cargo carried for its liner services that fall under the agreement, inclusive of all ocean freight charges, whether assessed on a port-to-port basis or a through intermodal basis; accessorial charges; surcharges; and charges for inland cargo carriage. Average revenue shall be calculated as the quotient of each party's total liner revenues in the entire geographic scope divided by its total cargo carried in the entire geographic scope.

When 50 percent or more of the total liner cargo carried by all the parties in the geographic scope of the agreement during the calendar quarter was containerized, each party shall report only its total carryings of containerized liner cargo (measured in TEUs) during the calendar quarter, total revenues generated by its carriage of containerized liner cargo, and average revenue per TEU. When 50 percent or more of the total liner
