National Toxicology Program: Announcement of a Public Meeting To Receive Comment on the NTP Vision and Input to a Roadmap for Implementation of the Vision

Summary

The National Toxicology Program (NTP) announces a public meeting to provide all interested parties an opportunity to express their views about the NTP Vision, provide input to a roadmap for implementation of the NTP Vision and comment on the views expressed by others. The NTP Vision for the 21st Century is to move toxicology from a predominately observational science at the level of disease-specific models to a predominately predictive science focused upon a broad inclusion of target-specific, mechanism-based, biological observations. The stimulus for the NTP Vision is to develop a framework that will promote the further advancement of toxicology and refine its traditional role as a predominately observational science.

The meeting will be held on January 29, 2004, at the Lister Hill Center Auditorium (Building 38A), National Library of Medicine, National Institutes of Health, 9000 Rockville Pike, Bethesda, Maryland, 20892. The meeting will begin at 9 a.m. on January 29 and will conclude by 5 p.m. or sooner if the public comments and discussion end earlier. On-site registration will begin at 8:30 a.m. on January 29. Attendance at the meeting is limited only by the space available. Additional details about the meeting, including background information, agenda, written comments, registration and security information are provided below and are also available from the
