

Alternatives to the Proposed Action

As required by Section 102(2)(E) of NEPA (42 U.S.C. 4322(2)(E)), possible alternatives to the final action have been considered. Only the manufacturer can perform the source exchange and the licensee has already scheduled the source exchange at the manufacturer's earliest available time. The only alternative is to deny the exemption request and to require the licensee to put the sources in storage until the source exchange and full inspection service can be performed. This option would not produce a gain in protecting the human environment, and it would negatively impact the licensee's provision of medical care to its patients.

Alternative Use of Resources

No alternative use of resources was considered due to the reasons stated above.

Agencies and Persons Consulted

No other agencies or persons were contacted regarding this proposed action.

Identification of Source Used

Letter from the Gamma Knife Center of the Pacific, to U.S. Nuclear Regulatory Commission, Region IV, dated November September 8, 2003.

E-mails from Ronald Flick to Jackie Cook, NRC, dated September 11, 12, and 18, 2003.

Finding of No Significant Impact

Based on the above environmental assessment, the Commission has concluded that the proposed action will not have a significant effect on the quality of the human environment. Accordingly, the NRC has determined that a Finding of No Significant Impact is appropriate and preparation of an environmental impact statement is not warranted.

The licensee's letter and e-mails are available for inspection, and/or copying for a fee, in the Region IV Public Document Room, 611 Ryan Plaza Drive, Suite 400, Arlington Texas 76011. The documents are available electronically for public inspection from the Publicly Available Records (PARS) component of NRC's Documents Access and Management System (ADAMS), accession number ML03300150.
