Background: On February 18, 2003, we published a direct final rule (68 FR 7706) and parallel proposal (68 FR 7735) amending the NESHAP for chemical recovery combustion sources at kraft, soda, sulfite, and stand-alone semichemical pulp mills (40 CFR part 63, subpart MM). The amendments clarified and consolidated the monitoring and testing requirements and added a site-specific alternative standard for one pulp mill. The consolidation of the monitoring and testing requirements resulted in significant text shifts within and between the monitoring and testing sections of the final rule.

On July 18, 2003 (68 FR 42603), we published amendments to the final rule that deleted portions of subpart MM added by the direct final rule (68 FR 7706), the provisions of which were the subject of adverse comment. The amendments also made two technical corrections to inadvertent errors in rule language. The EPA indicated in that notice that if we took further action, we would do so by acting on the pending proposed rule (68 FR 7735) and would not submit that proposal to another round of public comment.

However, the amendments inadvertently failed to restore some of the underlying rule language from the original rule. We are restoring those provisions here. The technical
