

Extension of Time Limit for the Preliminary Results of Antidumping Duty Administrative and New Shipper Reviews, (68 FR 60640).

The petitioners have submitted recent pre-preliminary comments concerning Jinan Yipin. We continue to evaluate these comments and we will consider them for the final results of review.

Scope of the Order

The products subject to the antidumping duty order are all grades of garlic, whole or separated into constituent cloves, whether or not peeled, fresh, chilled, frozen, provisionally preserved, or packed in water or other neutral substance, but not prepared or preserved by the addition of other ingredients or heat processing. The differences between grades are based on color, size, sheathing, and level of decay.

The scope of this order does not include the following: (a) garlic that has been mechanically harvested and that is primarily, but not exclusively, destined for non-fresh use; or (b) garlic that has been specially prepared and cultivated prior to planting and then harvested and otherwise prepared for use as seed.

The subject merchandise is used principally as a food product and for seasoning. The subject garlic is currently classifiable under subheadings 0703.20.0010, 0703.20.0020, 0703.20.0090, 0710.80.7060, 0710.80.9750, 0711.90.6000, and 2005.90.9700 of the *Harmonized Tariff Schedule of the United States* (HTSUS). Although the HTSUS subheadings are provided for convenience and customs purposes, the written description of the scope of this proceeding is dispositive. In order to be excluded from the antidumping duty order, garlic entered under the HTSUS subheadings listed above that is (1) mechanically harvested and primarily, but not exclusively, destined for non-fresh use or (2) specially prepared and cultivated prior to planting and then harvested and otherwise prepared for use as seed must be accompanied by declarations to U.S. Customs and Border Protection (Customs) to that effect.

Verification

As provided in section 782(i) of the Tariff Act of 1930, as amended (the Act), we verified information provided by certain respondents using standard verification procedures, including on-site inspection of the producers' facilities, the examination of relevant sales and financial records, and the selection of original documentation containing relevant information. Our verification results are outlined in the

public versions of the verification reports, which are on file in the Central Records Unit (CRU). With respect to Shandong Heze International Trade and Developing Company (Shandong Heze), the verification took place recently and, therefore, the report is still pending completion and not yet on file. We will issue the report shortly after the issuance of these preliminary results of review and parties can comment on the applicability of the verification findings to our calculations. Following issuance of these preliminary results, we intend to verify the factors-of-production (FOP) information which Jinan Yipin has submitted.

Separate Rates

The Department has treated the PRC as a non-market-economy (NME) country in all past antidumping investigations (see, e.g., *Notice of Final Determination of Sales at Less Than Fair Value: Bulk Aspirin From the People's Republic of China*, 65 FR 33805 (May 25, 2000), and *Notice of Final Determination of Sales at Less Than Fair Value: Certain Non-Frozen Apple Juice Concentrate from the People's Republic of China*, 65 FR 19873 (April 13, 2000)) and in prior segments of this proceeding. A designation as an NME remains in effect until it is revoked by the Department. See section 771(18)(C) of the Act. Accordingly, there is a rebuttable presumption that all companies within the PRC are subject to government control and, thus, should be assessed a single antidumping duty rate.

It is the Department's standard policy to assign all exporters of the merchandise subject to review in NME countries a single rate unless an exporter can affirmatively demonstrate an absence of government control, both in law (*de jure*) and in fact (*de facto*), with respect to exports. To establish whether a company is sufficiently independent to be entitled to a separate, company-specific rate, the Department analyzes each exporting entity in an NME country under the test established in the *Final Determination of Sales at Less Than Fair Value: Sparklers from the People's Republic of China*, 56 FR 20588 (May 6, 1991) (Sparklers), as amplified by the *Notice of Final Determination of Sales at Less Than Fair Value: Silicon Carbide from the People's Republic of China*, 59 FR 22585 (May 2, 1994) (*Silicon Carbide*).

For the reasons discussed in the section below titled "The PRC-Wide Rate and Use of Facts Otherwise Available", we have determined that Top Pearl Ltd. (Top Pearl) and Wo Hing (H.K.) Trading Co. (Wo Hing) do not qualify for a separate rate and are

deemed to be covered by the PRC-entity rate.

Jinan Yipin Corporation Ltd. (Jinan Yipin), Shandong Heze, Trans-High, and Harmoni provided separate-rate information in their responses to our original and supplemental questionnaires. Accordingly, we performed separate-rates analyses to determine whether each producer/exporter is independent from government control (see *Notice of Final Determination of Sales at Less Than Fair Value: Bicycles From the People's Republic of China*, 61 FR 56570 (April 30, 1996)).

1. Absence of De Jure Control

The Department considers the following *de jure* criteria in determining whether an individual company may be granted a separate rate: (1) an absence of restrictive stipulations associated with an individual exporter's business and export licenses; (2) any legislative enactments decentralizing control of companies; (3) any other formal measures by the government decentralizing control of companies.

Each respondent has placed on the record a number of documents to demonstrate absence of *de jure* control including the "Foreign Trade Law of the People's Republic of China" and the "Administrative Regulations of the People's Republic of China Governing the Registration of Legal Corporations." The Department has analyzed such PRC laws and found that they establish an absence of *de jure* control. See, e.g., *Preliminary Results of New Shipper Review: Certain Preserved Mushrooms From the People's Republic of China*, 66 FR 30695, 30696 (June 7, 2001). We have no information in this proceeding that would cause us to reconsider this determination.

2. Absence of De Facto Control

Typically, the Department considers four factors in evaluating whether a respondent is subject to *de facto* governmental control of its export functions: (1) whether the export prices are set by, or subject to, the approval of a governmental authority; (2) whether the respondent has authority to negotiate and sign contracts, and other agreements; (3) whether the respondent has autonomy from the government in making decisions regarding the selection of its management; (4) whether the respondent retains the proceeds of its export sales and makes independent decisions regarding disposition of profits or financing of losses. See *Silicon Carbide* at 22587.

As stated in previous cases, there is some evidence that certain enactments
