Title: NSPS for Standards of Performance for Storage Vessels for Petroleum Liquids for Which Construction, Reconstruction or Modification Commenced after June 11, 1973, and Prior to May 19, 1978 (40 CFR Part 60, Subpart K).

Abstract: The New Source Performance Standards (NSPS) for the regulations published at 40 CFR part 60, subpart K were proposed on June 11, 1973, and promulgated on March 8, 1974. These regulations apply to facilities in 40 CFR part 60, subpart K that store petroleum liquids in: storage vessels with petroleum liquids which have a storage capacity greater than 151,416 liters (40,000 gallons), and for which construction commenced after June 11, 1973, and prior to May 19, 1978; storage vessels greater than 151,416 liters (40,000 gallons) but not exceeding 246,052 liters (65,000 gallons), and where construction or modification commenced after March 8, 1974, and prior to May 19, 1978; storage vessels that have a capacity greater than 246,052 liters (65,000 gallons), and where construction or modification commenced after June 11, 1973, and prior to May 19, 1978. Affected facilities report only if a storage vessel is no longer subject to 40 CFR part 60, subpart K and will now be subject to the current storage vessel standard, 40 CFR part 60, subpart Kb. The subpart K standards also require the owner/operator to document (recordkeeping) the activities of the storage period, the maximum true vapor pressure, and the type of petroleum liquid stored. This information is recorded only when a petroleum liquid is changed in the

storage vessel. Facilities that are not subject to the Standards of Performance for Storage Vessels for Petroleum Liquids, 40 CFR part 60, subpart K, are storage vessels of petroleum or condensate stored, processed, and/or treated at a drilling and production facility prior to custody transfer.
