**Item I—New Consolidated Form for Selection of Architect-Engine Contractors (FAR Case 2000–608)**

This final rule amends the FAR to replace SF 254, Architect-Engineer and Related Services Questionnaire, and SF 255, Architect-Engineer and Related Services Questionnaire for Specific Projects, with SF 330, Architect-Engineer Qualifications. The SF 330 reflects current architect-engineer practices in a streamlined and updated format and is organized into data blocks that readily support automation. An interagency *ad hoc* committee developed the SF 330. It was based on the results of a joint Federal-industry survey of the existing SFs 254 and 255 conducted by the Standing Committee on Procurement and Contracting of the Federal Facilities Council (FCC) in 1995 and published in 1996 as FCC Report Number 130, entitled “Survey on the

Use of SFs 254 and 255 for Architect-Engineer Qualifications.” The survey’s purpose was to evaluate the current use of the forms, which are used for the submission of qualifications by architect-engineer (A–E) firms interested in Federal contracts, and to identify possible improvements which would enable the existing forms to better serve the needs of Federal agencies and the A–E industry.

The policies and the SF 330, Architect-Engineer Qualifications, of this final rule are effective for all agencies and their solicitations issued on or after January 12, 2004. However, agencies may delay implementation of this final rule until June 8, 2004, at which time it becomes mandatory for all agencies and their solicitations issued on or after that date. Use of the SF 330 becomes effective January 12, 2004. However, until June 8, 2004, agencies

may authorize the continued use of the SFs 254 and 255 instead.

**Item II—Depreciation Cost Principle (FAR Case 2001–026)**

This final rule amends FAR parts 2 and 31 to revise the depreciation cost principle (FAR 31.205–11) by improving clarity and structure and removing unnecessary and duplicative language. The case was initiated at the request of the Aerospace Industries Association. The rule does not change the allowability of depreciation costs. However, changes have been made that may effect the determination of depreciable costs for tangible personal property; for example, only residual values in excess of 10 percent need be used and residual values need not be recognized when certain depreciation methods are used. This rule is of particular interest to contractors and contracting officers who use cost
