

identified sites, as defined in § 192.903, in accordance with paragraph (c) of the same section.

(4) The operator is to complete identification of high consequence areas by December 17, 2004.

(b) If an operator selects method (2) then:

(1) The operator is to calculate potential impact circles, as defined in § 192.903, centered on the centerline of the pipeline for all areas of its pipeline where the circles could contain 20 buildings intended for human occupancy or an identified site.

(2) The operator is to evaluate the potential impact circles to determine if they contain 20 buildings intended for human occupancy. Each separate dwelling unit in a multiple dwelling unit building is counted as a separate building intended for human occupancy.

(i) If the radius of the potential impact circle is greater than 660 feet (200 meters), the operator may identify a high consequence area based on a prorated number of buildings intended for human occupancy until December 17, 2006. If an operator chooses this approach, the operator must prorate the number of buildings intended for human occupancy based on the ratio of an area with a radius of 660 feet (200 meters) to the area of the potential impact circle (i.e., the prorated number of buildings intended for human occupancy is equal to $[20 \times (660 \text{ feet [or 200 meters]} / \text{potential impact radius in feet [or meters]})^2]$).

(3) The operator is to evaluate the potential impact circles to determine if they contain identified sites, as defined in § 192.903, in accordance with paragraph (c) of this section.

(4) The operator is to complete identification of high consequence areas by December 17, 2004.

(c) Operators are to identify sites meeting the criteria of identified sites, as defined in § 192.903. The process for identification is in § 192.905. Further guidance was provided in (68 FR 42456; July 17, 2003) titled *issuance of advisory bulletin*. Operators must document, and retain for review during inspections, their rationale for selecting the source(s) used, including why it/they are appropriate for use.

(d) Requirements for incorporating newly identified high consequence areas into an integrity management program are in § 192.905.
