

specifications of the annual quotas will be accomplished on or about December 1 of the third year of the quota period, unless the quotas are modified in the interim pursuant to § 648.71(b). The amount of surfclams available for harvest annually must be specified within the range of 1.85 to 3.4 million bu (98.5 to 181 million L) per year. The amount of ocean quahogs available for harvest annually must be specified within the range of 4 to 6 million bu (213 to 319.4 million L).

(1) *Quota reports.* On an annual basis, MAFMC staff will produce an Atlantic surfclam and ocean quahog annual quota recommendation paper to the MAFMC based on the latest available stock assessment report prepared by NMFS, data reported by harvesters and processors, and other relevant data, as well as the information contained in paragraphs (a)(1)(i) through (vi) of this section. Based on that report, and at least once prior to August 15 of the year in which a 3-year annual quota specification expires, the MAFMC, following an opportunity for public comment, will recommend to the Regional Administrator annual quotas and estimates of DAH and DAP within the ranges specified for a 3-year period. In selecting the annual quotas, the MAFMC shall consider the current stock assessments, catch reports, and other relevant information concerning:

(i) Exploitable and spawning biomass relative to the OY.

(ii) Fishing mortality rates relative to the OY.

(iii) Magnitude of incoming recruitment.

(iv) Projected effort and corresponding catches.

(v) Geographical distribution of the catch relative to the geographical distribution of the resource.

(vi) Status of areas previously closed to surfclam fishing that are to be opened during the year and areas likely to be closed to fishing during the year.

(2) *Public review.* Based on the recommendation of the MAFMC, the Regional Administrator shall publish proposed surfclam and ocean quahog quotas in the **Federal Register**.

Comments on the proposed annual quotas may be submitted to the Regional Administrator within 30 days after publication. The Assistant Administrator shall consider all comments, determine the appropriate annual quotas, and publish the annual quotas in the **Federal Register** on or about December 1 of each year. The quota shall be set at that amount that is most consistent with the objectives of the Atlantic Surfclam and Ocean Quahog FMP. The Regional

Administrator may set quotas at quantities different from the MAFMC's recommendations only if he/she can demonstrate that the MAFMC's recommendations violate the national standards of the Magnuson-Stevens Act and the objectives of the Atlantic Surfclam and Ocean Quahog FMP and other applicable law.

(b) *Interim quota modifications.* Based upon information presented in the quota reports described in paragraph (a)(1) of this section, the MAFMC may recommend to the Regional Administrator a modification to the annual quotas that have been specified for a 3-year period and any estimate of DAH or DAP made in conjunction with such specifications within the ranges specified in paragraph (a)(1) of this section. Based upon the Council's recommendation, the Regional Administrator may propose surfclam and or ocean quahog quotas that differ from the annual quotas specified for the current 3-year period. Such modification shall be in effect for a period of 3 years from the year in which it is first implemented, unless further modified. Any interim modification shall follow the same procedures for establishing the annual quotas that are specified for a 3-year period.

(c) *Annual quotas.* The annual quotas for surfclams and ocean quahogs will remain effective unless revised pursuant to this section. NMFS will issue notification in the **Federal Register** if the previous year's specifications will not be changed.

* * * * *

■ 4. In § 648.75, paragraph (b) is revised to read as follows:

§ 648.75 Cage identification.

* * * * *

(b) *Issuance.* The Regional Administrator will issue a supply of tags to each individual allocation owner qualifying for an allocation under § 648.70 prior to the beginning of each fishing year, or he/she may specify, in the **Federal Register**, a vendor from whom the tags shall be purchased. The number of tags will be based on the owner's initial allocation as specified in § 648.70(a). Each tag represents 32 bu (1,700 L) of allocation.

* * * * *

■ 5. In § 648.77, paragraph (a)(1) is revised to read as follows:

§ 648.77 Framework adjustments to management measures.

(a) * * *

(1) *Adjustment process.* The Council shall develop and analyze appropriate management actions over the span of at least two Council meetings. The Council

must provide the public with advance notice of the availability of the recommendation(s), appropriate justification(s) and economic and biological analyses, and the opportunity to comment on the proposed adjustment(s) at the first meeting, and prior to and at the second Council meeting. The Council's recommendations on adjustments or additions to management measures must come from one or more of the following categories: The overfishing definition (both the threshold and target levels), description and identification of EFH (and fishing gear management measures that impact EFH), habitat areas of particular concern, set-aside quota for scientific research, VMS, OY range, and suspension or adjustment of the surfclam minimum size limit.

RIN 0648-AQ88

Fisheries of the Exclusive Economic Zone Off Alaska; Revision to the Management of "Other Species" Community Development Quota

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule.

SUMMARY: NMFS issues a final rule to modify the management of the "other species" Community Development Quota (CDQ) reserve by eliminating specific allocations of "other species" CDQ to individual CDQ managing organizations (CDQ groups) and, instead, allowing NMFS to manage the "other species" CDQ reserve with the general limitations used to manage the catch of non-CDQ groundfish in the Bering Sea and Aleutian Islands management area (BSAI). This action also eliminates the CDQ non-specific reserve and makes other changes to improve the clarity and consistency of CDQ Program regulations. This action is necessary to improve NMFS' ability to effectively administer the CDQ Program. It is intended to further the goals and objectives of the North Pacific Fishery
