

determined pursuant to paragraph (c)(3) of this section. The result constitutes the area-specific per diem charge. Finally, multiply the area-specific per diem charge by the number of days of care to obtain the total skilled nursing facility/sub-acute inpatient facility charge.

(2) *Per diem charge.* To establish a baseline, a nationwide average per diem billed charge is calculated based on charges reported in the MedPAR skilled nursing facility file. For this purpose, the following MedPAR charge categories are included: room and board (private, semi-private, and ward), physical therapy, occupational therapy, inhalation therapy, speech-language pathology, pharmacy, medical/surgical supplies, and "other" services. The following MedPAR charge categories are excluded from the calculation of the per diem charge and will be billed separately, using the charges determined as set forth in other applicable paragraphs of this section, when these services are provided to skilled nursing patients or sub-acute inpatients: ICU and CCU room and board, laboratory, radiology, cardiology, dialysis, operating room, blood and blood administration, ambulance, MRI, anesthesia, durable medical equipment, emergency room, clinic, outpatient, professional, lithotripsy, and organ acquisition services. The resulting average per diem billed charge is then multiplied by the 80th percentile adjustment factor determined pursuant to paragraph (c)(2)(i) of this section to obtain a nationwide 80th percentile charge level. Finally, the resulting amount is trended forward to the effective time period for the charges, as set forth in paragraph (c)(2)(ii) of this section.

(i) *80th percentile adjustment factor.* Using the MedPAR skilled nursing facility file, the ratio of the day-weighted 80th percentile room and board per diem charge to the day-weighted average room and board per diem charge is obtained for each geographic area. The geographic area-based ratios are averaged to obtain the 80th percentile adjustment factor.

(ii) *Trending forward.* The 80th percentile charge is trended forward based on changes to the inpatient hospital services component of the CPI-U. Actual CPI-U changes are used from the time period of the source data through the latest available month as of the time the calculations are performed. The three-month average annual trend rate as of the latest available month is then held constant to the midpoint of the calendar year in which the charges are primarily expected to be used. The projected total CPI-U change so

obtained is then applied to the 80th percentile charge.

(3) *Geographic area adjustment factors.* The average billed per diem charge for each geographic area is calculated from the MedPAR skilled nursing facility file. This amount is divided by the nationwide average billed charge calculated in paragraph (c)(2) of this section. The geographic area adjustment factor for charges for each VA facility is the ratio for the geographic area in which the facility is located.

(d) *Partial hospitalization facility charges.* When VA provides or furnishes partial hospitalization services that are within the scope of care referred to in paragraph (a)(1) of this section, the facility charges billed for such services will be determined in accordance with the provisions of this paragraph. Partial hospitalization facility charges are per diem charges that vary by geographic area. These charges are calculated as follows:

(1) *Formula.* For each partial hospitalization stay, multiply the nationwide per diem charge determined pursuant to paragraph (d)(2) of this section by the appropriate geographic area adjustment factor determined pursuant to paragraph (d)(3) of this section. The result constitutes the area-specific per diem charge. Finally, multiply the area-specific per diem charge by the number of days of care to obtain the total partial hospitalization facility charge.

(2) *Per diem charge.* To establish a baseline, a nationwide median per diem billed charge is calculated based on charges associated with partial hospitalization from the outpatient facility component of the Medicare Standard Analytical File 5 percent Sample. That median per diem billed charge is then multiplied by the 80th percentile adjustment factor determined pursuant to paragraph (d)(2)(i) of this section to obtain a nationwide 80th percentile charge level. Finally, the resulting amount is trended forward to the effective time period for the charges, as set forth in paragraph (d)(2)(ii) of this section.

(i) *80th percentile adjustment factor.* The 80th percentile adjustment factor for partial hospitalization facility charges is the same as that computed for skilled nursing facility/sub-acute inpatient facility charges under paragraph (c)(2)(i) of this section.

(ii) *Trending forward.* The 80th percentile charge is trended forward based on changes to the outpatient hospital services component of the CPI-U. Actual CPI-U changes are used from the time period of the source data

through the latest available month as of the time the calculations are performed. The three-month average annual trend rate as of the latest available month is then held constant to the midpoint of the calendar year in which the charges are primarily expected to be used. The projected total CPI-U change so obtained is then applied to the 80th percentile charges, as described in paragraph (d)(2) of this section.

(3) *Geographic area adjustment factors.* The geographic area adjustment factors for partial hospitalization facility charges are the same as those computed for outpatient facility charges under paragraph (e)(4) of this section.

(e) *Outpatient facility charges.* When VA provides or furnishes outpatient facility services that are within the scope of care referred to in paragraph (a)(1) of this section, the charges billed for such services will be determined in accordance with the provisions of this paragraph. Charges for outpatient facility services vary by geographic area and by CPT/HCPCS code. These charges apply in the situations set forth in paragraph (e)(1) of this section and are calculated as set forth in paragraph (e)(2) of this section.

(1) *Settings and circumstances in which outpatient facility charges apply.* Outpatient facility charges consist of facility charges for procedures, diagnostic tests, evaluation and management services, and other medical services, items, and supplies provided in the following settings and circumstances:

(i) Outpatient departments and clinics at VA medical centers;

(ii) Other VA provider-based entities; and

(iii) VA non-provider-based entities, for procedures and tests for which no corresponding professional charge is established under the provisions of paragraph (f) of this section.

(2) *Formula.* For each outpatient facility charge CPT/HCPCS code, multiply the nationwide 80th percentile charge determined pursuant to paragraph (e)(3) of this section by the appropriate geographic area adjustment factor determined pursuant to paragraph (e)(4) of this section. The result constitutes the area-specific outpatient facility charge. When multiple surgical procedures are performed during the same outpatient encounter by a provider or provider team, the outpatient facility charges for such procedures will be reduced as set forth in paragraph (e)(5) of this section.

(3) *Nationwide 80th percentile charges by CPT/HCPCS code.* For each CPT/HCPCS code for which outpatient facility charges apply, the nationwide
