

period for the charges, as set forth in paragraph (j)(2)(ii) of this section. The results constitute the nationwide 80th percentile base and hourly facility charges for observation care.

(ii) *Trending forward.* The nationwide 80th percentile base and hourly facility charges for observation care, obtained as described in paragraph (j)(2)(i) of this section, are trended forward based on changes to the outpatient hospital services component of the CPI-U. Actual CPI-U changes are used from the time period of the source data through the latest available month as of the time the calculations are performed. The three-month average annual trend rate as of the latest available month is then held constant to the midpoint of the calendar year in which the charges are primarily expected to be used. The projected total CPI-U change so obtained is then applied to the 80th percentile charges.

(3) *Geographic area adjustment factors.* The geographic area adjustment factors for observation care facility charges are the same as those computed for outpatient facility charges under paragraph (e)(4) of this section.

(k) *Ambulance and other emergency transportation charges.* When VA provides ambulance and other emergency transportation services that are within the scope of care referred to in paragraph (a)(1) of this section, the charges billed for such services will be determined in accordance with the provisions of this paragraph. The charges for these services vary by HCPCS code, length of trip, and geographic area. These charges are calculated as follows:

(1) *Formula.* For each occasion of ambulance or other emergency transportation service, add the nationwide base charge for the appropriate HCPCS code determined pursuant to paragraph (k)(2)(i) of this section to the product of the number of miles traveled and the appropriate HCPCS code mileage charge determined pursuant to paragraph (k)(2)(ii) of this section. Then multiply this amount by the appropriate geographic area adjustment factor determined pursuant to paragraph (k)(3) of this section. The result constitutes the area-specific ambulance or other emergency transportation service charge.

(2)(i) *Nationwide 80th percentile all-inclusive base charge.* To calculate a nationwide all-inclusive base charge, all ambulance and other emergency transportation claims are selected from the outpatient facility component of the Medicare Standard Analytical File 5 percent Sample. Excluding professional and mileage charges, as well as all-

inclusive charges which are reported on such claims, the total charge per claim, including incidental supplies, is computed. Then, the 80th percentile amount for each HCPCS code is computed. Finally, the resulting amounts are each trended forward to the effective time period for the charges, as set forth in paragraph (k)(2)(iii) of this section. The results constitute the nationwide 80th percentile all-inclusive base charge for each HCPCS base charge code.

(ii) *Nationwide 80th percentile mileage charge.* To calculate a nationwide mileage charge, all ambulance and other emergency transportation claims are selected from the outpatient facility component of the Medicare Standard Analytical File 5 percent Sample. Excluding professional, incidental, and base charges, as well as claims with all-inclusive charges, the total mileage charge per claim is computed. This amount is divided by the number of miles reported on the claim. Then, the 80th percentile amount for each HCPCS code, using miles as weights, is computed. Finally, the resulting amounts are each trended forward to the effective time period for the charges, as set forth in paragraph (k)(2)(iii) of this section. The results constitute the nationwide 80th percentile mileage charge for each HCPCS mileage code.

(iii) *Trending forward.* The nationwide 80th percentile charge for each HCPCS code, obtained as described in paragraphs (k)(2)(i) and (k)(2)(ii) of this section, is trended forward based on changes to the outpatient hospital services component of the CPI-U. Actual CPI-U changes are used from the time period of the source data through the latest available month as of the time the calculations are performed. The three-month average annual trend rate as of the latest available month is then held constant to the midpoint of the calendar year in which the charges are primarily expected to be used. The projected total CPI-U change so obtained is then applied to the 80th percentile charges.

(3) *Geographic area adjustment factors.* The geographic area adjustment factors for ambulance and other emergency transportation charges are the same as those computed for outpatient facility charges under paragraph (e)(4) of this section.

(l) *Charges for durable medical equipment, drugs, injectables, and other medical services, items, and supplies identified by HCPCS Level II codes.* When VA provides DME, drugs, injectables, or other medical services, items, or supplies that are identified by

HCPCS Level II codes and that are within the scope of care referred to in paragraph (a)(1) of this section, the charges billed for such services, items, and supplies will be determined in accordance with the provisions of this paragraph. The charges for these services, items, and supplies vary by geographic area, by HCPCS code, and by modifier, when applicable. These charges are calculated as follows:

(1) *Formula.* For each HCPCS code, multiply the nationwide charge determined pursuant to paragraphs (l)(2), (l)(3), and (l)(4) of this section by the appropriate geographic area adjustment factor determined pursuant to paragraph (l)(5) of this section. The result constitutes the area-specific charge.

(2) *Nationwide 80th percentile charges for HCPCS codes with RVUs.* For each applicable HCPCS code, RVUs are compiled from the data sources set forth in paragraph (l)(2)(i) of this section. The RVUs are multiplied by the charge amount for each incremental RVU determined pursuant to paragraph (l)(2)(ii) of this section, and this amount is added to the fixed charge amount also determined pursuant to paragraph (l)(2)(ii) of this section. Then, for each HCPCS code, this charge is multiplied by the appropriate 80th percentile to median charge ratio determined pursuant to paragraph (l)(2)(iii) of this section. Finally, the resulting amount is trended forward to the effective time period for the charges, as set forth in paragraph (l)(2)(iv) of this section to obtain the nationwide 80th percentile charge.

(i) *RVUs for DME, drugs, injectables, and other medical services, items, and supplies.* For the purpose of the statistical methodology set forth in paragraph (l)(2)(ii) of this section, HCPCS codes are assigned to the following HCPCS code groups. For the HCPCS codes in each group, the RVUs or amounts indicated constitute the RVUs:

(A) Chemotherapy Drugs: Ingenix/St. Anthony's RBRVS Practice Expense RVUs.

(B) Other Drugs: Ingenix/St. Anthony's RBRVS Practice Expense RVUs.

(C) DME—Hospital Beds: Medicare DME Fee Schedule amounts.

(D) DME—Medical/Surgical Supplies: Medicare DME Fee Schedule amounts.

(E) DME—Orthotic Devices: Medicare DME Fee Schedule amounts.

(F) DME—Oxygen and Supplies: Medicare DME Fee Schedule amounts.

(G) DME—Wheelchairs: Medicare DME Fee Schedule amounts.
