The IID is proposing to construct a 230 or 500 kilovolt (kV) electrical transmission line located parallel and adjacent to Interstate Highway 10 between North Palm Springs and Blythe, California, a distance of approximately 118 miles. Four alternatives to the proposed project are being considered in this EIS/EIR. These alternatives are consistent with the California Desert Conservation Area (CDCA) Plan of 1980, as amended, with the exception of Alternative B. This alternative is located partially outside of designated utility corridors under the CDCA Plan and would, if selected, require an amendment to this land use plan.

The BLM, together with the IID, have jointly prepared this draft EIS/EIR. The BLM is the lead Federal agency for the preparation of this EIS/EIR in compliance with the requirements of the National Environmental Policy Act
