

Dated: December 15, 2003.

Stephen L. Johnson,

Acting Administrator.

■ For the reasons set forth in the preamble, title 40, Chapter I of the Code of Federal Regulations is amended as follows:

PART 51—REQUIREMENTS FOR PREPARATION, ADOPTION, AND SUBMITTAL OF IMPLEMENTATION PLANS

■ 1. The authority citation for part 51 continues to read as follows:

Authority: 23 U.S.C. 101; 42 U.S.C. 7401–7671q.

Subpart P—Protection of Visibility

■ 2. Section 51.309 is amended by revising paragraphs (b)(6) and (d)(5)(i), removing paragraphs (d)(5)(ii) and (d)(5)(iii), and redesignating paragraph (d)(5)(iv) as (d)(5)(ii), to read as follows:

§ 51.309 Requirements related to the Grand Canyon Visibility Transport Commission.

* * * * *

(b) * * *

(6) *Continuous decline in total mobile source emissions* means that the projected level of emissions from mobile sources of each listed pollutant in 2008, 2013, and 2018, are less than the projected level of emissions from mobile sources of each listed pollutant for the previous period (*i.e.*, 2008 less than 2003; 2013 less than 2008; and 2018 less than 2013).

* * * * *

(d) * * *

(5) * * *

(i) Statewide inventories of onroad and nonroad mobile source emissions of VOC, NO_x, SO₂, PM_{2.5}, elemental carbon, and organic carbon for the years 2003, 2008, 2013, and 2018.

(A) The inventories must demonstrate a continuous decline in total mobile source emissions (onroad plus nonroad; tailpipe and evaporative) of VOC, NO_x, PM_{2.5}, elemental carbon, and organic carbon, evaluated separately. If the inventories show a continuous decline in total mobile source emissions of each of these pollutants over the period 2003–2018, no further action is required as part of this plan to address mobile source emissions of these pollutants. If the inventories do not show a continuous decline in mobile source emissions of one or more of these pollutants over the period 2003–2018, the plan submission must provide for an implementation plan revision by no later than December 31, 2008 containing any necessary long-term strategies to

achieve a continuous decline in total mobile source emissions of the pollutant(s), to the extent practicable, considering economic and technological reasonableness and federal preemption of vehicle standards and fuel standards under title II of the CAA.

(B) The plan submission must also provide for an implementation plan revision by no later than December 31, 2008 containing any long-term strategies necessary to reduce emissions of SO₂ from nonroad mobile sources, consistent with the goal of reasonable progress. In assessing the need for such long-term strategies, the State may consider emissions reductions achieved or anticipated from any new Federal standards for sulfur in nonroad diesel fuel.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 437

[FRL–7601–3]

RIN 2040–AD95

Effluent Limitations Guidelines, Pretreatment Standards, and New Source Performance Standards for the Centralized Waste Treatment Point Source Category

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is amending certain provisions of a wastewater discharge regulation for the Centralized Waste Treatment (CWT) Point Source Category. Today's action deletes the selenium limitations and standards from certain sections of Subpart A, the Metals Treatment and Recovery subcategory. In addition, it deletes the barium, molybdenum, antimony, and titanium limitations and standards from Subpart B, the Oils Treatment and Recovery subcategory. Further, this action deletes the molybdenum, antimony, aniline, and 2,3-dichloroaniline limitations and standards from the Organics Treatment and Recovery subcategory. This action also revises all applicable related sections of Subpart D, the Multiple Wastestream subcategory, to reflect the preceding revisions. Finally this action increases the maximum monthly average BOD₅ limitation for directly discharging facilities subject to a section of the Multiple Wastestreams

subcategory. EPA originally established wastewater discharge standards for CWT facilities in December 2000. Following publication of that rule, a number of CWT facilities petitioned EPA to reconsider the limitations and standards for certain pollutants. EPA evaluated the technology basis and other analyses and agreed with many of the suggested revisions. Today's action establishes those changes. As a result, facilities will not be required to comply with certain discharge standards that were erroneously included in the earlier regulation or for which EPA had incorrectly assessed the capability of the technology to achieve the removals.

DATES: This regulation shall become effective on December 22, 2003.

ADDRESSES: The administrative record is available for inspection and copying at the Water Docket, located at the EPA Docket Center (EPA/DC) in the basement of the EPA West Building, Room B–102, 1301 Constitution Ave., NW., Washington, DC. The rule and key supporting materials are also electronically available via EPA Dockets (Edocket) at <http://www.epa.gov/edocket/> Edocket number OW–2003–0075 or at <http://www.epa.gov/guide/cwt/>.
