

implementation of restrictions specified in a Settlement Agreement, which was ordered to be implemented by the Court.

Based on the May 23, 2002, Court Order, the management measures implemented by the August 1, 2002, interim rule and its extension, must remain in effect until implementation of Amendment 13 to the FMP, which is scheduled to be in effect no later than May 1, 2004. On January 22, 2003, NMFS published a Notice of Continuation of Regulations in the **Federal Register** (68 FR 2919) to inform the public of the continuance of the interim regulations for a second 180-day period. Under the Magnuson-Stevens Act, however, the authority to implement interim regulations is limited to two consecutive 180-day periods. The second 180-day period ended on July 27, 2003.

Because the schedule for implementation of Amendment 13 was extended until May 1, 2004, emergency Secretarial action was necessary to continue the current management measures from July 28, 2003, until the implementation of Amendment 13 (on or about May 2004). Due to the need to continue the regulations until May 1, 2004, a proposed emergency rule, soliciting public comment, was published on April 24, 2003 (68 FR 20096), and subsequently corrected on May 9, 2003 (68 FR 24914), followed by a final emergency rule (68 FR 38234), published on June 27, 2003, implementing emergency measures intended to reduce overfishing on species managed under the FMP and to continue most interim conservation measures specified in the Settlement Agreement until Amendment 13 is implemented. These measures included a freeze on days-at-sea (DAS) at the highest annual level used from fishing years 1996–2000 and a 20-percent cut from that level; a freeze on the issuance of new open access Hand-gear permits; gear restrictions for certain gear types, including gillnets, hook-gear and trawl nets; modifications and additions to the closure areas; and restrictions on yellowtail flounder catch. In addition, in response to public comment on the proposed rule, the final emergency rule implemented measures pertaining to haddock, including reducing the haddock minimum size limit for private recreational and party/charter vessels to 21 inches (52.5 cm), and relaxing the haddock trip limit (also known as bag limit) for charter/party and open access Handgear permit vessels.

Pursuant to section 305(c) of the Magnuson-Stevens Act, the June 27, 2003, emergency rule may remain in effect for 180 days and may be extended

through publication in the **Federal Register**, for one additional period of 180 days, provided the public has had an opportunity to comment on the emergency rule. The public was given such opportunity to comment in the form of a proposed rule before the final emergency rule was published. NMFS has determined that it is necessary to continue this emergency rule to reduce overfishing and to comply with the Court Order. Because the management measures implemented by the June 27, 2003, final emergency rule were written in such a way as to be effective indefinitely, no formal regulatory action is necessary. Instead, to comply with section 305(c) of the Magnuson-Stevens Act, it is necessary only to publish in the **Federal Register** a Notice of Continuation of Regulations to inform the public that NMFS has decided to continue these regulations. The impacts of continuing the Settlement Agreement measures, with some modifications, were analyzed in the Environmental Assessment completed for the June 27, 2003, final emergency rule.

The June 27, 2003, final emergency rule was determined to be significant for purposes of Executive Order 12866.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: December 16, 2003.

Rebecca Lent,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

RIN 0648–AQ79

Fisheries of the Northeastern United States; 2004 Fishing Quotas for Atlantic Surfclams, Ocean Quahogs, and Maine Mahogany Ocean Quahogs

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final Rule - 2004 fishing quotas for Atlantic surfclams, ocean quahogs, and Maine mahogany ocean quahogs.

SUMMARY: NMFS is required pursuant to 50 CFR 648.71 to specify annual catch quotas for the Atlantic surfclam and ocean quahog fisheries. In order to meet

this regulatory requirement, NMFS issues this rule to set final quotas for the Atlantic surfclam, ocean quahog, and Maine mahogany ocean quahog fisheries for 2004. These regulations specify allowable harvest levels of Atlantic surfclams and ocean quahogs from the Exclusive Economic Zone and an allowable harvest level of Maine mahogany ocean quahogs from Atlantic waters north of 43° 50' N. lat. in 2004.

DATES: Effective from January 1, 2004, through December 31, 2004.

ADDRESSES: Copies of the surfclam and ocean quahog quota specifications document for 2004, including the Environmental Assessment, Regulatory Impact Review, Initial Regulatory Flexibility Analysis (EA/RIR/IRFA), and the Essential Fish Habitat Assessment, and other supporting documents, are available from Daniel Furlong, Executive Director, Mid-Atlantic Fishery Management Council, Room 2115, Federal Building, 300 South New Street, Dover, DE 19904–6790. The Final Regulatory Flexibility Analysis (FRFA) consists of the IRFA, public comments and responses contained in this final rule, and the summary of impacts and alternatives contained in this final rule. Copies of the small entity compliance guide are available from Patricia A. Kurkul, Regional Administrator, NMFS, Northeast Regional Office, One Blackburn Drive, Gloucester, MA 01930–2298. A copy of the EA/RIR/IRFA is accessible via the Internet at <http://www.nero.gov/ro/doc/nr.htm>.

FOR FURTHER INFORMATION CONTACT: Susan W. Chinn, Fishery Management Specialist, 978–281–9218, susan.chinn@noaa.gov.

SUPPLEMENTARY INFORMATION: The Fishery Management Plan for the Atlantic Surfclam and Ocean Quahog Fisheries (FMP) requires that NMFS, in consultation with the Mid-Atlantic Fishery Management Council (Council), specify quotas for surfclams and ocean quahogs on an annual basis from a range that represents the optimum yield (OY) for each fishery. It is the policy of the Council that the levels selected allow sustainable fishing to continue at that level for at least 10 years for surfclams and 30 years for ocean quahogs. In addition to this constraint, the Council policy also considers the economic impacts of the quotas. Regulations implementing Amendment 10 to the FMP, published on May 19, 1998 (63 FR 27481), added Maine mahogany ocean quahogs (locally known as mahogany quahogs) to the management unit and provided that a small artisanal fishery for ocean quahogs in the waters north of 43° 50' N. lat. has an annual quota with
