G. Eligible Programs of the U.S. Geological Survey (USGS)

The mission of the U.S. Geological Survey is to provide information on biology, geology, hydrology, and cartography that contributes to the wise management of the Nation's natural resources and to the health, safety, and well-being of the American people. Information includes maps, data bases, and descriptions and analyses of the water, plants, animals, energy, and mineral resources, land surface, underlying geologic structure and dynamic processes of the earth. Information on these scientific issues is developed through extensive research, field studies, and comprehensive data collection to: evaluate natural hazards such as earthquakes, volcanoes, landslides, floods, droughts, subsidence and other ground failures; assess energy, mineral, and water resources in terms of their quality, quantity, and availability; evaluate the habitats of animals and plants; and produce geographic, cartographic, and remotely-sensed information in digital and non-digital formats. No USGS programs are specifically available to American Indians or Alaska Natives. Components of the following programs may have a special geographic, cultural, or historical connection with a self-governance tribe:

- 1. *Mineral, Environmental, and Energy Assessments.*
- 2. *USGS Earthquake Hazards Reduction Program.*
- 3. *Water Resources Data Collection and Investigations.*
- 4. *Biological Resources Inventory, Monitoring, Research and Information Transfer Activities.*

IV. Programmatic Targets

During Fiscal Year 2004, upon request of a self-governance tribe each non-BIA bureau will negotiate annual funding agreements for its eligible programs beyond those already negotiated.

Dated: December 5, 2003.
