#### Saltville Gas Storage Company L.L.C.; Notice of Intent To Prepare an Environmental Assessment for the Proposed Saltville Storage Project and Request for Comments on Environmental Issues

December 16, 2003.

The staff of the Federal Energy Regulatory Commission (FERC or Commission) will prepare an environmental assessment (EA) that will discuss the environmental impacts of the construction of a limited number of new facilities and operation of existing facilities by Saltville Gas Storage Company L.L.C. (Saltville) in Smyth and Washington Counties, Virginia.<sup>1</sup> Saltville is currently developing a new 8.2 billion cubic feet (Bcf), underground natural gas storage facility using depleted salt caverns that was previously authorized for construction and operation by the Virginia State Corporation Commission. Saltville has received all necessary state regulatory approvals to construct and operate its storage facility. See Appendix 1 for a list of the facilities and their construction status. The EA will focus its analysis on the facilities that still need to be constructed, and on restoration of the areas previously disturbed or currently being disturbed by on-going construction activities. This EA will be used by the Commission in its decision-making process to determine whether the project is in the public convenience and necessity.

The Saltville Storage Project is located entirely on land that is either already owned by Saltville or over which it already holds all necessary rights-of-

<sup>1</sup> Saltville's application was filed with the Commission under section 7(c) of the Natural Gas Act and part 157 of the Commission's regulations. The Commission determined that the project should be subject to Federal regulation. Therefore, Saltville has filed for approval to complete construction of the project and to operate it pursuant to Federal regulatory requirements.
