

Voluntary Aftermarket Part Certification Program, OMB# 2060-0060, Expiration date 02/29/04.

**Abstract:** The information required is the minimal necessary to ensure that the part to be certified actually performs as required. Without this information EPA would have no way to control and audit fraudulent or marginal submissions. Information is only collected when the part is tested to be certified, if no information is collected at the time of testing there will be no means of showing later that the part was properly designed. EPA would not be able to control the self-certification of parts and this could, therefore, result in certified parts that cause vehicles to fail emissions standards.

The information collected is part of the requirement of section 207(a) of the Clean Air Act, and as described in section 40 CFR part 85, subpart V. This is a voluntary certification program and there is no requirement that any manufacturer participate.

The total estimated involvement of the aftermarket part industry (replacement and specialty parts) is 1 part per year.

The EPA would like to solicit comments to:

(i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(ii) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information; including the validity of the methodology and assumptions used;

(iii) Enhance the quality, utility, and clarity of the information to be collected; and

(iv) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of responses.

**Burden Statement:** EPA's burden estimated for this information collection is broken down into three parts: reporting, testing and record keeping burden. EPA estimates that the reporting burden will be 20 hours, testing 150 hours and annual record keeping 1 hour. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, disclosure or provide information to or for a federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying

information, processing and maintaining information, and disclosing and providing information; adjusting the existing ways to comply with any previously applicable instructions and requirements; training personnel to be able to respond to a collection of information; searching data sources; completing and reviewing the collection of information; and transmitting or otherwise disclosing the information.

**Respondents/Affected Entities:** Parties potentially affected by this action are automotive manufacturers and builders of automotive after market parts.

**Estimated Number of Respondents:** 1.

**Frequency of Response:** On occasion.

**Estimated Total Annual Hour Burden:** 861 hours.

**Estimated Total Annualized Cost Burden:** \$ 37,380.

Dated: December 15, 2003.
