## ENVIRONMENTAL PROTECTION AGENCY

[FRL-7604-6]

### Clean Air Act Operating Permit Program; Petition for Objection to State Operating Permit DuPont Dow Elastomers, L.L.C.

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice of final order on petition to object to State operating permit.

**SUMMARY:** This notice announces that the EPA Administrator has denied the petition to object to a State operating permit issued by the Louisiana Department of Environmental Quality (LDEQ) for the chloroprene plant at DuPont Dow Chemical Company in La Place, Louisiana. Pursuant to section 505(b)(2) of the Clean Air Act (Act), the petitioner may seek judicial review of this petition response in the United States Court of Appeals for the Fifth Circuit. Any petition must be filed within 60 days of the date this notice appears in the **Federal Register**, pursuant to section 307(d) of the Act.

**ADDRESSES:** You may review copies of the final order, the petition, and other supporting information at the Environmental Protection Agency, Region 6, 1445 Ross Avenue, Dallas, Texas 75202-2733. If you wish to examine these documents, you should make an appointment at least 24 hours before visiting day. The final order is also available electronically at the following address: <http://www.epa.gov/>

[region07/programs/artd/air/title5/petitiondb/petitiondb2001.htm](http://region07/programs/artd/air/title5/petitiondb/petitiondb2001.htm).

**FOR FURTHER INFORMATION CONTACT:** Ms. Bonnie Braganza, Air Permitting Section, Multimedia Planning and Permitting Division, U.S. EPA, Region 6, 1445 Ross Avenue, Dallas, Texas 75202-2733, telephone (214) 665-7340, or e-mail at [braganza.bonnie@epa.gov](mailto:braganza.bonnie@epa.gov).

**SUPPLEMENTARY INFORMATION:** The Act affords EPA a 45-day period to review, and object as appropriate to, operating permits proposed by State permitting authorities. Section 505(b)(2) of the Act authorizes any person to petition the EPA Administrator within 60 days after the expiration of this review period to object to State operating permits if EPA has not done so. Petitions must be based only on objections to the permit that were raised with reasonable specificity during the public comment period provided by the State, unless the petitioner demonstrates that it was impracticable to raise these issues during the comment period or the grounds for the issues arose after this period.

The Louisiana Environmental Action Network submitted a petition requesting that the Administrator object to a title V operating permit issued by LDEQ to DuPont Dow Chemical Company, for the chloroprene unit at the DuPont Dow Elastomer's facility, in La Place, Louisiana.

The petitioner requested that the Administrator object to the DuPont Dow permit based on the following broad assertions:

1. LDEQ's interpretation of 40 Code of Federal Regulations (CFR) 63.115 is inconsistent with the Act's goal of protecting public health;
2. LDEQ's interpretation would result in increased discharges of halogenated organic hazardous air pollutants (HAP), an "extremely dangerous" class of pollutants;
3. LDEQ's interpretation results in greater controls of nonhalogenated vent streams relative to halogenated vent streams;
4. A rational interpretation of 40 CFR 63.115 must result in a Group 1 classification and the accompanying control requirements;
5. LDEQ has misinterpreted 40 CFR 63.115.

On November 20, 2003, the Administrator issued an order denying the petition. The order explains the reasons for the Administrator's decision.

Dated: December 18, 2003.

**Lawrence E. Starfield,**

*Acting Regional Administrator, Region 6.*

## ENVIRONMENTAL PROTECTION AGENCY

[AMS-FRL-7605-7]

### California State Motor Vehicle Pollution Control Standards; Within the Scope Requests; Opportunity for Public Hearing and Comment

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice of opportunity for public hearing and public comment.

**SUMMARY:** The California Air Resources Board (CARB) has notified EPA that it has approved amendments to its regulations establishing certification requirements and procedures for heavy-duty diesel engines and vehicles. The amendments require heavy-duty engines and vehicles (except urban buses) to meet a new mandatory oxides of nitrogen (NO<sub>x</sub>) standard in 1998 and subsequent model years and establish optional NO<sub>x</sub> standards beginning with the 1995 model year. CARB's amendments also provide a new definition of useful life for these vehicles and require new information within California's motor vehicle emission control label. CARB requests that EPA confirm CARB's finding that its amendments are within-the-scope of previous waivers issued by EPA under section 209(b) of the Clean Air Act (Act), 42 U.S.C. 7543(b), including a waiver of Federal preemption for California's heavy-duty diesel powered engines and vehicles, which EPA approved on March 4, 1988.

CARB has also notified EPA that it has approved amendments to its regulations establishing certification requirements and procedures for heavy-duty diesel engines and vehicles defined as urban buses. These amendments update the emission standards for particulate matter (PM) and NO<sub>x</sub> for urban buses and align California's PM standards with Federal standards for such engines in the 1994 and 1995 model years. These amendments also align California PM standards with the Federal PM standard for 1996 and later model years and California's NO<sub>x</sub> standard with Federal standards starting in the 1996 model year. The amendments also provide for an optional, more stringent, NO<sub>x</sub> emission standard beginning with the 1994 model year. CARB's amendments also provide a new definition of useful life for these vehicles and require new information within California's motor vehicle emission control label. CARB requests that EPA confirm CARB's finding that its amendments are within-the-scope of previous waivers issued by
