

Title: Digital Television Transition Information Questionnaires.

Form Number: N/A.

Respondents: Business or other for-profit entities.

Number of Respondents: 844.

Estimated Time per Response: 4 to 24 hours.

Frequency of Response: On occasion reporting requirement.

Total Annual Burden: 4,823 hours.

Total Annual Cost: \$251,400.

Needs and Uses: In the Telecommunications Act of 1996, Congress directed that every broadcaster be given a second channel for digital operations. At the end of the transition, broadcasters' analog channels will be returned to the government. Congress set a target date of December 31, 2006, for the end of the transition, although that date can be extended if 85% of viewers in a particular market do not have access to the digital signals. In addition, at the end of the transition the broadcast spectrum will contract from channels 2-69 to channels 2-51. This 108 MHz of spectrum (channels 52-69) can then be used by advanced wireless services and public safety authorities. There are several key building blocks to a successful transition. First, content—consumers must perceive something significantly different than what they have in analog. Second, distribution—the content must be delivered to consumers in a simple and convenient way. Third, equipment—must be capable, affordable and consumer-friendly. And fourth, education—consumers must be educated about what digital television is, and what it can do for them. These information requests are designed to gather data in these key areas.
