Title: Approval of State Coastal Nonpoint Pollution Control Programs (OMB Control No. 2040-0153, EPA ICR No. 1569.05). This is a request to renew an existing approved collection that is scheduled to expire on April 30, 2003. Under the OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB.

Abstract: Under the provisions of national Program Development and Approval Guidance implementing section 6217 of the Coastal Zone Act Reauthorization Amendments of 1990 (CZARA) which was jointly developed and published by EPA and the National Oceanic and Atmospheric Administration (NOAA), 29 coastal States and 5 coastal Territories with Federally approved Coastal Zone Management Programs have developed and submitted to EPA and NOAA Coastal Nonpoint Pollution Programs. EPA and NOAA have approved 9 States and 3 Territories, conditionally approved 19 States and 2 Territories, and one State's initial program submission (Indiana) is currently under review. The conditional approvals will require States and Territories to submit additional information in order to obtain final program approval. Indiana will also need to submit information in order to obtain approval of its coastal nonpoint program. Administrative changes issued on October 16, 1998, and mutually agreed to by States, Territories, EPA and NOAA are expected to expedite the final approval process. CZARA section 6217 requires States and Territories to obtain final approval of their Coastal Nonpoint Pollution Programs in order to retain their full

share of funding available to them under section 319 of the Clean Water Act and section 306 of the Coastal Zone Management Act. The information collected under section 6217 and this ICR will not require States and Territories to collect any confidential information.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15, and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 148 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: 20 States and 2 Territories with approved coastal zone management programs.

Estimated Number of Respondents: 22.

Frequency of Response: Once.

Estimated Total Annual Hour Burden: 3,250 hours.

Estimated Total Annual Cost: \$113,738, includes \$0 annualized capital or O&M costs.

Changes in the Estimates: There is a decrease of 375 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This decrease is the result of EPA and NOAA having fully approved 12 of the 34 programs.

Dated: February 10, 2003.

Director, Collection Strategies Division.
